

Discovery Collective Recommended Curriculum for 2026–2027

Why These Resources?

Instead of spending countless hours researching curriculum options, I've done the research for you.

After evaluating many of today's leading mastery-based and AI-supported learning platforms—including those used by innovative schools like Alpha School and Acton Academy—I selected the following learning resources for my own daughter.

Families are welcome to choose different resources if they prefer. However, using these recommendations creates a more seamless experience for learners as they collaborate throughout the year.

Need help getting started?

Upon receiving the monthly contribution agreement & the initial deposit to secure your learner's seat; I am happy to schedule a working session with your learner and/or your family to help create each account, answer questions, and ensure every learning resource is ready before the first day of Discovery Collective.

Subject	Curriculum	Estimated Cost
Vocabulary	Membean	\$72/year
Grammar & Mechanics	EGUMPP	\$99/year (can get a code for \$52/year)

 - ✓ Flexible Pace
 - ✓ Cultivates a Love of Learning
-

Learning Resource Details

Membean – Vocabulary development through adaptive review.

EGUMPP – Mastery-based grammar and mechanics.

ReadTheory - Adaptive reading practice that meets students at their level and grows with them.

Math Academy – Mastery-based, personalized mathematics instruction.

Generation Genius – Engaging, standards-aligned science lessons.

Khanmigo – AI tutor that supports science and deeper learning.

Tuttle Twins Academy – Economics, civics, government, entrepreneurship, and history.

Foundation Worldview – Biblical worldview and critical thinking (introduced later in the year).

Our goal isn't simply to complete curriculum.

Our goal is to cultivate curious thinkers, capable problem-solvers, courageous leaders, and lifelong learners.
