

# Temp Space-- Treatment coming

Circa Spring/Summer 1994:

“How can I know genius if I don’t know insanity,” said James to his best friend Bret.  
“How can I truly know the difference, without experiencing them both.. Don’t they really create and inform each other?”

Circa Fall 1994:

Bret notes:

Let's begin with the premise that I'm working on a theory (and testing of that theory with appropriate methodologies , colleagues and apparatuses) which transcends and includes the physics that you speak of and which I alluded to. That physics, while acknowledging what we might call spirit and consciousness, is primarily if not only, concerned with the understanding and manipulation of material reality, of what is considered physical or objective.

Physics is science not mysticism, whereas mysticism is science and more. Physics is concerned with space-time, energy-matter, motion and related:

"Physics is the natural science that studies matter, its motion, and behavior through space and time, and that studies the related entities of energy and force."

I am using common physics language, facts, metaphors, concepts and frameworks to share a new story of modern mysticism, in a sense. A new story of unified wisdom that in some circles might be called Unified Physics that I imagine needs to be called Metaphysics or Mysticism in order to properly be in the ballpark of what it really is.

There is not a direct and literal correspondence between what I am positing and modern physics. I am transcending and including physics and the use of physics for the aforementioned understanding and manipulation of material reality as we conceive it currently. This understanding of physics whilst being transcended still stands strong just as relativity did not obsolete Newtonian mechanics it just expanded it. This transcending and including allows us to finally see the marriage of spiritual and physical. Now, this marriage is only for show.. there is no actual truth to 'spiritual' and 'physical' ever being separate in any real sense. That is why I say 'to finally see' rather than to finally happen. Ultimately, we are pointing to the apocalypse of unity consciousness coming back into awareness compared to the polarized state of being that most of planet earth embodies.

There is, before space-time, and prior to energy-matter, a realm of awareness that is the ground on which the edifice of physics, (and its understanding of energy and matter and space and time) stands.

This ground, in a sense, is immaterial. It is subtle and yet more powerful than the empty space which froths with the quantum foam of vacuum energy and string theory elements.

This ground can be labeled (but not known) as the perceiver and its perceived. All perceptions, thoughts, emotions, feelings and sense of self and similar are the building blocks which in-form our reality, and which in-form our physics. This ground transcends and includes physics. Physics is a subset of this ground. If I had to name it, again, I would call what I am speaking about, The Science and Art of Mettaphysics; or simply Mysticism. I use the prefix metta in a few ways simultaneously:

Alluding to 'metta' (in Theravada Buddhism) meditation focused on the development of unconditional love for all beings.; and Mettā (Pali) or maitrī (Sanskrit) means benevolence, loving-kindness, friendliness, amity, good will, and active interest in others, and, a sincere wish for the welfare and genuine happiness of all beings, without exception. Also alluding to: referring to itself or to the conventions of its genre; self-referential. Also alluding to: Meta (from the Greek meta- μετά- meaning "after" or "beyond") is a prefix used in English to indicate a concept which is an abstraction behind another concept, used to complete or add to the latter. Also alluding to: The use of the prefix meta here derives from Plato's metaxis, describing an oscillation and simultaneity between and beyond diametrically opposed poles.

We can master physics and become the most dominate domesticated primates in existence. We can master Mettaphysics and become the most unconditionally loving beings in existence and from that awareness we make use of physics.

~~

*From [The Gene Keys by Richard Rudd](#):*

*Your Life's Work/Brand: This aspect of your Profile and its relevant Gene Key highlights the ideal arena of your external work in the world. This is the role that most suits your creative expression and that allows you the full freedom to be yourself without compromise. The Shadow of this Gene Key describes what*

*tends to occur around you when you lose touch with your true self. At the other end of the spectrum, the Siddhi or highest potential of this Gene Key describes you living at the absolute zenith of your genetic potential. In your Pearl Sequence this Sphere is known as your 'Brand' as it guides you in how to best express your highest Gifts in order that you can achieve true recognition in life.*

### *THE 54th GIFT – ASPIRATION*

*MATERIAL AND SPIRITUAL LIQUIDITY When the 54th Shadow (greed) transforms into a higher frequency, the 54th Gift of Aspiration is born. Aspiration here refers to the energy to aspire to something beyond the material realm. Aspiration contains within it the seeds of all higher consciousness. At the Gift level, aspiration has to do with working with others for the benefit of others. The Gift concerns the way in which energy is invested. At the Shadow level, any accumulated energy went back into the drive to accumulate more, with no other real purpose. At this higher level of frequency, accumulated energy is recycled and used to support people lower down in the hierarchy. In this way, a truly healthy model is created. The roots support the branches, twigs and flowers and the fruit fertilises the roots. The 54th Gift is aware that all systems in nature are interconnected and therefore cutting off energy from one area will ultimately deplete your own resources.*

*The 54th Gift aspires to a higher vision of prosperity. It still operates within its own community or organization, but it knows that the secret of real growth and expansion (the 53rd Gift) lies in mutually cooperative models between different groups or organizations. Aspiration allows you a much broader vision of how to create prosperity for everyone. Here we see ambition moving beyond the personal and into the communal. These people want their entire community to thrive in order that they can draw more and more people up the hierarchy away from the self destructive patterns of the lower frequencies. The by-product of this cross-fertilisation with other communities is exponential growth for everyone. Today the 54th Gift is more in evidence as more and more high-level businessmen and women begin to think in these new holistic business terms. However, this new phenomena is just being born into the world. People are only now realising that businesses with a holistic perspective can be even more successful than greed-driven businesses.*

*This shift in perspective from self-serving to community-serving is giving birth to a whole new paradigm in business itself. For the first time since the industrial revolution, people are asking what the real purpose of business is. Instead of being an end in itself, business is being seen as a means to create a better and more sustainable world. Through networking with other businesses at similar high frequencies, enormous change is possible in our world. As these so called cultural creatives begin to work together and dovetail their energies and resources, they open up entirely new vistas that could potentially transform our entire planet. When enough people with aspiration overcome their individual*

*fear and competitiveness, they will create a deep and lasting equilibrium in the global economy. The real urge behind aspiration is to seek out this higher harmony, and in the material world this means moving money from places where there is too much to places where there is not enough.*

*The Gift of Aspiration has some other fascinating qualities connected to the transformation of energy into more rarified frequencies... The 54th Gift also transfers its higher frequency through the medium of physical presence, but in doing so it immediately put others at ease. You can smell a supportive energy just as easily as you can smell fear. Thus the 54th Gift has its own biofeedback loop that creates trust wherever it goes.*

*Because the 54th Gift attunes to a higher communal vision, it only attracts people who resonate with this same subtle frequency. Therefore, it is essential that people with this Gift meet people face to face at the beginning of their relationships and that they do their business in the flesh. The 54th Gift has a deep instinctive understanding of money and energy through this genetic resonance to the liquid nature of memory. Wherever energy or money is kept in a liquid state and allowed to flow between people and organizations, prosperity is engendered. When it is frozen or amassed for too long it prevents further expansion. The same laws that apply within the human body also apply to society and economics.*

*As the energy of the Gift of Aspiration reaches higher frequencies it becomes more spiritual. Thus these people also understand energy flow and transformation as taught by various yogic systems and disciplines... The flow of prosperity is directly proportional to the flow of energy at all levels within your life, beginning with your own body, which is the foundation of all journeys to higher consciousness. The 54th Gift is the base plate for all systems of alchemical transformation from lower states of frequency into higher modes of consciousness, and as such it is an extremely powerful and influential gift.*
