

****Military Aviation Death Prevention Act****

A bill to minimize stateside servicemember training deaths in the aviation field.

****Section 1: Findings****

1. This Congress finds that each year, preventable deaths in Marine Corps aviation occur due to lack of funding for proper maintenance repair.
2. This Congress is interested in minimizing servicemember deaths wherever possible.

****Section 2: Funding****

1. An additional \$500 million shall be allocated each year for the next ten (10) fiscal years to the Department of the Navy.
2. This money shall be used to fund the service of planes designated the property of the United States Marine Corps.
3. Acceptable uses of funding shall be:
 - a. the purchase of parts for the maintenance and repair of existing Marine Corps aircraft,
 - b. the training and designation of additional Marine Corps servicemembers as aircraft repair specialists, specifically servicemembers with the military occupational specialties in the 60XX, 61XX, and 62XX fields,
 - c. additional training for existing aircraft repair specialists, Marine aviators, and Marine Naval Flight Officers (NFO)

****Section 3: Enaction****

This bill shall come into effect in the fiscal year following its passage.

This bill was authored and sponsored by CheckMyBrain11, Junior Senator for the Commonwealth of the Chesapeake.
