ABSTRACT

ARTICLE INFO:

Received: 13 September 2021.

Accepted: 10 October 2021.

Published: 17 April 2022.

Keywords: (Please provide 4 to 6 keywords, which can be used for indexing purposes)

XXXX, XXXX, XXXX, XXXXXX

Sample text inserted for illustration. Replace with abstract text. Your abstract should give readers a brief summary of your article. It should concisely describe the contents of your article, and include key terms. It should be informative, accessible and not only indicate the general scope of the article but also state the main results obtained and conclusions drawn. It should not contain undefined abbreviations and no table numbers, figure numbers, references or equations should be referred to. It should not normally be more than 250 words. (Should be divided in: purpose, methods, results and conclusions) For life science papers only (when applicable).

Introduction

State the objectives of the work and provide an adequate background, avoiding detailed literature) or a summary of the results. Sample text inserted for illustration. Replace with article text, including headings where appropriate. Figures and tables can be single-or double-column width as appropriate. During the production process they will be placed at the top or bottom of columns, after they are first cited in the text. Manuscripts should be prepared according to APA, 7th ed., Cite references in the text in alphabetical order first, and chronological order second Subsection heading (Headings: Please use no more than three levels of displayed head

Materials and Methods

Provide sufficient details to allow the work to be reproduced by an independent researcher. Methods that are already published should be summarized and indicated by a reference. If quoting directly from a

previously published method, use quotation marks and cite the source. Any modifications to existing methods should also be described.

.1

Results

Results should be clear and concise and presented separately from the discussion.

Tables: All tables are to be numbered using Arabic numerals.

Tables should always be cited in text in consecutive numerical order. For each table, please supply a table caption (title) explaining the components of the table.

Footnotes to tables should be indicated by superscript lower-case letters (or asterisks for significance values and other statistical data) and included beneath the table body. Footnotes to tables should be indicated by superscript lower-case letters (or asterisks for

significance values and other statistical data) and included beneath the table body

Discussion

This should explore the significance of the results of the work, not repeat them.

Conclusions

The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section

Acknowledgements

Acknowledgments of people, grants, funds, etc. should be placed in a separate section on the title page. The names of funding organizations should be written in full.

Conflict of interest: The authors declare that there are no conflicts of interest

References

Enclose the references list at the end of the manuscript accordingly to the APA (American Psychological Association) style (5th to 7th) edition.
