

Website Copy

Hey gene,

Just came across your website and while reading it was clear that it could better capture the reader's attention by making it better match the tone of a masculine man while making it engaging.

New copy would better motivate, encourage, and convince men to be more masculine making them almost have no choice but to buy.

This would make the men relate to the words then taking them from having no drive or purpose to feeling ultra powerful and feeling unstoppable.

Do you want some examples of my work?

Warm regards,
Ari
