

Editey

Websites on Google Drive

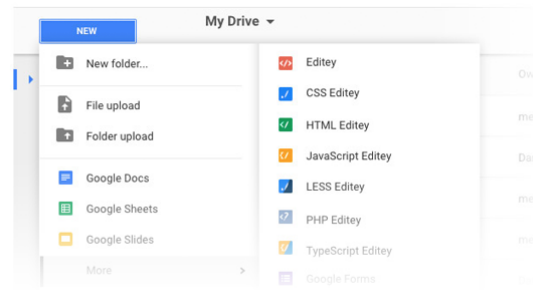

Create, edit and publish HTML, CSS and JavaScript files right on Google Drive.

Google Drive Integration

Editey integrates into Google Drive just like Google Docs. Everyone can work together in the same document at the same time.

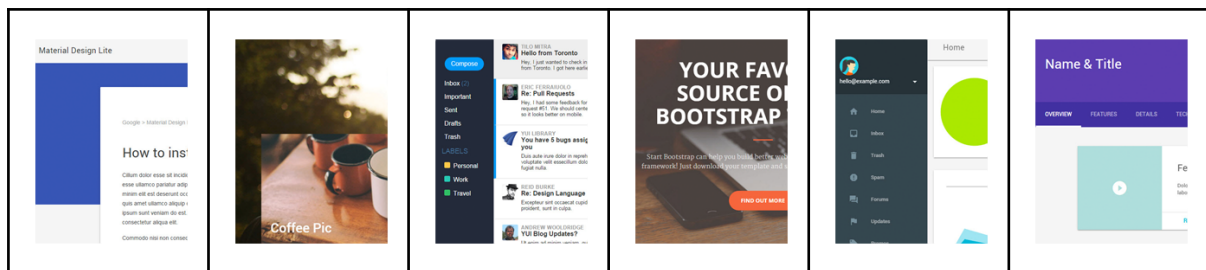

All your changes are automatically saved. You can even use revision history to see old versions of the same file, sorted by date and who made the change.

Edit your files in your local Google Drive folder with any editor of your choice and let Editey pick up your changes automatically.

Get a head start with templates

Choose from a wide variety of examples based on different responsive frameworks - designed to make your work that much better, and your life that much easier.

The Editey Family

Editey comes with a dedicated application for each file type.

This will help you to create new files right from the Google Drive create menu and to open recent files.

Publish Website

Publishing and hosting your website is just a single click away. Your site will be published on Google's content delivery network.

Edit your files in your local Google Drive folder with any editor of your choice and let Editey pick up your changes automatically.

Fine-Grained Permission Control

Assign permissions for each subscriber of a shared group.

Read-only, Edit-only and Full Access available.

Enterprise customers can host our application in their own private cloud.
