

## **Keeping Your Parent Center Kingdom Safe**

Just as in medieval times, the security of the castle was essential for those who relied on benefits provided in the kingdom, so securing our Parent Centers to ensure we continue to operate without interruption is of the highest priority. During this session, we will engage in discussion with participants about various scenarios that can lead to gaps in digital safety and discuss possible avenues to help secure our digital loot.

If the words “attacked,” “breached,” and “undermined” cause your heart rate to accelerate like you are being chased by a fire breathing dragon -- you need to attend this session. Tools and examples will be provided by three Parent Centers to assess your current security measures related to your domain name, website, email, and data, along with steps to enhance the security of your Parent Center

### **Presenters:**

Karen Harrison, Executive Director, TNSTEP

Stephanie Willis, Director of Communications, TNSTEP

Joe LaBelle, Director of Programs Impact; Director FND Social, Family Network on Disabilities

Kristina Henning, Director of Statewide Services, Partners Resource Network (PRN)
