

Tab 1

We are a youth-led organization mobilizing policy-makers and the public to prepare for a future where **AI can fulfill its transformative potential**. We combine grassroots organizing with high-level advocacy to ensure that AI systems are safe, equitable, and accountable. Our network comprises students, policy advocates, technologists, and organizers dedicated to creating a secure, fair, and free digital future. Our platform has been endorsed by world leaders, Nobel Prize-winning scholars, celebrities, and young people like you!

OPPORTUNITIES TO JOIN

Work on consultations with international fora, strategize advocacy campaigns, and generate recommendations for a safer world. Additionally, create a global advocacy campaign based on Encode's widely endorsed AI 2030 platform.

Encode Organizers:

Execute activities at the national or city level. Respond to tasks from the education lead regarding the development of country-specific curricula and briefings. Lead at least one country-specific policy report or memo and organize a minimum number of education workshops (with flexibility to do more). May also engage in research, coalition-building, or press work based on interest and need.

Encode Supporters:

Serve as responsive, country-specific points of contact with a strong understanding of local tech policy. While not required to lead initiatives, they support Encode's work by sharing insights, networks, and feedback as needed.

All roles have clear pathways for deeper involvement and leadership

Examples of Past Actions:

[Delivered testimony at UN negotiations to call on nations around the globe to support a legally binding treaty on autonomous weapons systems \(2x\)](#)

[Developed Technical White Papers on autonomous weapons systems and presented findings to diplomatic delegations](#)

[Submitted consultations to the UN, UNESCO, EU Commission, and several global safety summits on topics ranging from bridging the global AI divide to the future of privacy](#)

[Actively endorse and participate in talks around the UN Global Digital Compact](#)

[Organized Global Conference on the Future of AI in Nigeria](#)
