PARAMETERS

files[].file;zip.file

files[].filename;zip.mimeType

With this building block you can create a zip from an array of files. You can create and fill an array of files with an “Add entry” block - see the sample below. The filename provided may contain a /, which is used as directory separator. So it's possible to have directories in the resulting zip.

Use cases

- Creating zip files with generated documents

Configuration

Ultradox will load the given files that are stored in the input variable.

Make sure that the input prefix matches the output prefix of the building block that provides the array of documents.

`icon:icon-prefix` Input prefix

Click on the input prefix button to specify the prefix for the array of documents.

Useful combinations

Creating a zip from multiple templates.

Generate PDF from **Contract Template**

fs-docs icon-pdf2

<https://help.ultradox.com/en/reference/googledocs/topdf.html>, Jump to Google Docs to PDF building block

PARAMETERS

;pdf.file,fs-red

Add entry with **2** values to the list **files[]**

fs-lists icon-add

<https://help.ultradox.com/en/reference/lists/addentry.html>, Jump to add entry building block

PARAMETERS

pdf.file;files[].file

;files[].filename

Generate PDF from **Addendum Template**

fs-docs icon-pdf2

<https://help.ultradox.com/en/reference/googledocs/topdf.html>, Jump to Google Docs to PDF building block

PARAMETERS

;pdf.file,fs-red

Add entry with **2** values to the list **files[]**

fs-lists icon-add

<https://help.ultradox.com/en/reference/lists/addentry.html>, Jump to add entry building block

PARAMETERS

pdf.file;files[].file

;files[].filename

Create a zip with given files

fs-tools icon-cube

PARAMETERS

files[].file;zip.file

files[].filename;zip.mimeType

Show the generated document **zip**
