MATH TASKS	
Among Us Task	Live Classroom Idea
COMMUNICATIONS: Align Communication Satellite You will need to discover the missing coordinates to align the communications satellite.	Solve an Among Us Math Mash Up. Put your completed task with the correct coordinates in the envelope.
ELECTRICAL: Change the Bulbs Crewmates need light in order to see their way around the Skeld ship. Change three bulbs to light the way.	Complete THREE rounds of Xtra Math on your Chromebook. Mark the back of your Task Card with an X for each round of Xtra Math that you completed.
CAFETERIA: Buy a Beverage The crewmate must earn 100 cents to buy a beverage.	Complete I.4 on IXL, getting your score to 100.
STORAGE: Find the Broken Space Tools There are many tools needed to keep the ship running smoothly. Some are broken. Find the tools that are not broken and keep the Skeld running smoothly!	Space Tools Sort - Find the tools that are broken so they can be repaired.
ADMIN: Chart a Course: On your own, or with a crewmate, use cards and a dry erase board to solve equations that add and subtract tens.	Use the Race Through Space map to chart a course rolling and pulling cards to add and subtract tens.
O2 - OXYGEN: Clean the O2 Filter In this task, the crewmates will clean the air filter so that breathing on the Skeld is easier.	Solve the equations and find the missing numbers on the 100 chart. Take a task card from the envelope, solve the problems by writing the correct numbers on the empty 100 grid.
LOWER ENGINE: Divert Power Crewmates will divert power to the reactor when they move the switch and power up when the task is complete.	Solve two equations on the page and toss one power ball into the power diverter. Divert the power by moving the switch.
REACTOR: Power Boost Boost power on the reactor so we have enough energy to complete our mission.	Using Seesaw Activities, complete the activity which will boost the power in the reactor by solving ten more, ten less, one more, one less problems. 1. NBT.5
MEDBAY: Administer the Vaccines The crewmates need to get the vaccines to avoid COVID-32.	Complete the activity page to allow for ample vaccines to be given.

ELA TASKS

Among Us Task

Communications: Download Data

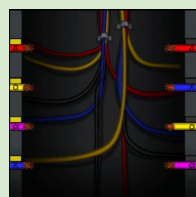

The crewmates need to transfer data from the 'Communications' folder to the 'My Tablet' folder. Do this by spinning the spinner and then reading a card from the Communications folder. When you are finished, place it into the 'My Tablet' folder. Read 20 cards to complete the mission.

Read the fluency passages using different expressions! Pull a card out of the communications folder and spin the wheel. After reading, drop the card in the 'My Tablet' folder. Read 20 cards to complete the mission!

Storage.: Fix Wiring

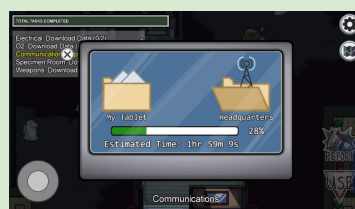

The wires are disconnected! Crewmates must solve the problems to reconnect the wires and get our ship moving.

(Connect rhyming words, circle the onset and underline the rime)

Admin: Upload Data

Crewmates are working to transfer data onto your spaceship tablet. Now you must get that data uploaded to the spaceship. Do this by solving the problem in the 'My Tablet' folder and then moving it into the 'Headquarters' folder.

(Connect words with missing vowel teams to the vowel team that correctly fills that space to make a read word)

Electrical: Calibrate Distributor

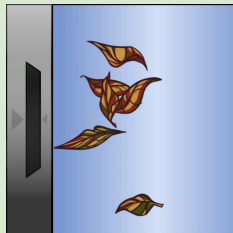

Complete sentences. "Which sentences are among us?"

MedBay: Inspect Sample

We need the right samples on the ship! Crewmembers must read the passage and decide which of the questions is the anomaly (or doesn't belong). Correctly identify all anomalies to complete this task!

Read the story "On the Moon." Decide which "sample" or question does NOT correctly match the answer.

O2: Clean the O2 Filter Write a letter to the imposter explaining what makes Earth so amazing and why it should be saved.	 Letter writing
Lower Engine: Fuel Engines To complete this task, crewmates must match the vowel sounds with the CVC words. Once all sounds are matched to the CVC words, the code to unlock the lock box will be revealed. Inside the lock box you will find the fuel you need for the engines. Once you retrieve them, lock the box back up and glue it onto your worksheet!	CVC Vowel Sound Match Match vowel sounds to words (listening activity on Seesaw) answers will spell out a code to unlock lock box..."fuel" pieces are inside the box and can be glued onto the gas canister worksheet 
Cafeteria: Buy a snack Earn 100 cents by getting a score of 100 on your IXL!	IXL: Complete an IXL with a score to 100
Upper Engine	Read to Self (get space books)

Hey first graders! Welcome to Skeld, a spaceship sent from Earth to help save the planet from complete destruction. We need your help! Today, many of you will be crewmates working to complete a set of tasks. Some of you will be imposters, whose sole purpose is to disarm the missiles that will be used to save Earth from the giant asteroid headed it's way. Listen to my friend to hear all about your important mission.

Today crewmates will be given a card with 6 tasks to complete in the morning, and 6 more in the afternoon. These tasks will test their knowledge of everything they've been learning and will help keep Skeld on it's path to complete its mission. There are, however, imposters among us. Just what will these imposters do? Keep listening to find out...

Imposters will be completing tasks as well, but they will also try to disarm the missiles by secretly moving the switches to shut them down. While completing your tasks, be on the lookout for these imposters. If you discover an imposter, use your red emergency meeting card to alert the crew that an emergency meeting is in order and begin phase one of eliminating the imposter. Good luck, crewmates! We're counting on you to save the day!
