

Kāinga Pūnaha Rorohiko | Zapworks

An introduction to Augmented Reality through Zapworks

| Tahī |

Augmented reality is an interactive digital experience of a real world environment often using the camera on your smartphone/tablet. This differs from virtual reality which is a complete immersion, often shutting out the physical world completely.

Notable apps and/or games include Pokemon Go, Ingress, Run Zombies, Run! and Harry Potter; Wizards Unite as well as snapchat and facebook filters

Your first challenge is to work your way through the Simple Quest Challenges found linked below. Complete these using the GoogleSlides (Technology Website) as a reference.

You will need to create a Zapworks account ([click here](#)) as well as download the Zappar App (free to download) onto your phone. You need the App to test your creations!

As you progress through the Challenges, keep a record of your thoughts and successes on the worksheet provided.
