

Reducing flakes in the periodics tests will become easier if it is possible to kick off tests as presubmits. There was a copy from the periodics to presubmits but some of these tests are still failing.

Job Name	Failure Description	Github Issue	PR
crio-e2e-eviction	Eviction tests have been failing for a while. Working on this but nothing looks out of ordinary	Eviction Issue	https://github.com/kubernetes/kubernetes/pull/120679
cos-cgroupv2-containerd-node-e2e-eviction	Eviction tests have been failing	Eviction Issue	https://github.com/kubernetes/kubernetes/pull/120679
crio-cgroupv1-node-e2e-features	SSH issues but sometimes it seems to work.	CRIO Community Cluster Migration issue	https://github.com/kubernetes/test-infra/pull/30918
cos-cgroupv2-containerd-serial	Gracefulshutdown test failures	Graceful Shutdown Issue	
e2e-inplace-pod-resize-containerd-main-v2	Configuration issue with cloning issue	https://github.com/kubernetes/kubernetes/issues/120926	https://github.com/kubernetes/test-infra/pull/30907
kubelet-containerd-alpha-features	Sidecar jobs are all failing	https://github.com/kubernetes/kubernetes/issues/120927	https://github.com/kubernetes/test-infra/pull/30908
serial-containerd-alpha-features	DRA Alpha issues are timing out	https://github.com/kubernetes/kubernetes/issues/120928	https://github.com/kubernetes/test-infra/pull/30910
node-memoryqos-cgroupv2	This looks to be related to the community cluster issue for CRIO. This is also running on fedora and uses CRIO.	CRIO Community Cluster Migration issue	https://github.com/kubernetes/test-infra/pull/30918
kubelet-serial-gce-e2e-hugepages	Start up issues. Node is not ready.	https://github.com/kubernetes/kubernetes/issues/120929
