

Essex RPE Ishiras Glyphing Lesson 1

Our normal rules are here

But we did something new this time! Agents played themselves and stats were based off their character badges much like the Misty Hannah Mind Palace event in Burbank. Some things were changed from our normal rules in this session to meet the needs for this session, so i hope you enjoy! This was my first time being a DM, GM, Patron ever and i will gladly do it again. I will not be sharing the private messages of this rp so i do not out who did what. Below is a link to the changes i made to fit this RPE. They are not official rules of any kind, just an idea of where i wanted this and the future Lessons to run. This lesson however helped me realize i have alot of changes that need to be done, but i still want to show how fluid it could become, thus making each Lesson interesting.

(1:10:20 PM) Ishira GlyphHunter

You are surrounded by a darkening forest, trees red and towering above you. You are in a place called Sequoia Park, a grove of redwoods on the edge of a small town in Northern California and you are walking in the middle of a ravine that is the main trail of the grove. In the distance you can hear kids playing, their laughter echoing through out the trees adding to the small noises that can be heard in the bushes close to the path. These whispers are from an unknown source and would send shivers down others spines that didn't understand what they were. The locals call them the voices and spirits of this forest, but no matter how hard you try to listen, you'll never be able to make out what they are saying. To your left an old stone chimney stands, crumbling on a old

foundation. If you look on your scanner you'll find a portal named Rose Walsh Fire Pit.

"Shield deployed." There is a flash of light that seems to come from the Tecthulhu and within moments the area around us darkens suddenly two feet past the foundation and what looks like the shields in the scanner come to life in a glow of green and blue on the edges. "There, now we

can begin. Its simple really, im going to show you a sequence glyph... And you will have to figure out what sequence it is.... Through trial and error.... That sequence is kinda unintuitive. First protect then gain knowledge? I mean, how are we supposed to know how to defend ourselves if the gain the knowledge later?

(2:51:38 PM) Catalina "CataCat" Reyes

(2:52:12 PM) Ariel Diana

It could mean that if you manage to defend your soul then you can gain knowledge for your mind...

(2:53:05 PM) Ariel Diana

"let's try a new one"

[2:53:11 PM] Ishira GlyphHunter

"Mind palaces are suppose to defend our minds and souls, thus defend the soul and mind by gaining knowledge. It may not have made sense to you, but it made sense to me and that is what matters when it comes to defending myself. "

I rather like that reasoning

[2:54:52 PM] Gerald Wolf (:de:)

I'd still have rearranged the glyphs to show in which sequence it is supposed to be done.

hahahahahahahaha "if you don't flow withing the framework of the owner of the mind palace it would be difficult to sort through it"

[2:55:42 PM] Ishira GlyphHunter

"And you could do that with your own sequence if you choose to use glyphs to protect yourself. If you are up for another round we can start another one, i just need to add shields to this portal...."

[2:56:03 PM] Catalina "CataCat" Reyes

"can we help you with the shields?"

[2:56:25 PM] Gerald Wolf (:de:)

"And one more thing, Glyphhunter: If our minds are all different and thereby also our mind palaces are different - would there be a different glyph sequence that works for each of us?"

I was also infused by it...

(2:58:13 PM) Ishira GlyphHunter

(2:59:26 PM) Catalina "CataCat" Reyes

Ok... fair enough

(3:01:05 PM) Ishira GlyphHunter

"Hrmm i think we can do one more round... Let me put the shields on." I open my scanner and deploy two shields, tracing another set of glyphs, the tecthulhu flashes again and the world disappears into darkness around us. The shields hum and a new sequence glyph pops up on your scanner.

@Lucoire -1 health, and now your rolls are +2

[17:07 PM] Ariel Diana

"So I am wondering if the sequence this time is longer than the 5 we normally see in the scanner...
after all it was mentioned that they do not have to conform to what we know"

[17:27 PM] Catalina "CataCat" Reyes

"same here Ariel... same here"

@Lucoire did you learn the lenght, and if so, are you team-playing?

[18:28 PM] Gerald Wolf (:de:)

As Cat already pointed out, "Self" must be part of it - and most likely in combination with "Defend".

[18:57 PM] Ishira GlyphHunter

"Gerald is correct... Self and Defend are part of the sequence.."

[1:19:08 PM] Gerald Wolf (:de:)

And I'm not fully certain but I'd guess that the sequence is longer than 5.

[1:19:23 PM] Ishira GlyphHunter

"You would be correct in that as well."

[1:21:07 PM] Deb SmurfRepellant

"I noticed the last two appear to be defend self"

[1:22:01 PM] Ishira GlyphHunter

"So you know Defend and Self are part of the sequence and that the length of this sequence is longer than five glyphs. Deb is correct, Defend and self are towards the end of the sequence but neither are the last glyph. They are in the correct order for their pairing."
