

## Web Programming Workshop

Assignment 2 - **DUE BY THE START OF CLASS FRIDAY NOV. 15**

### Prompt:

- Tell a visual story using HTML and CSS.
- Your story can feature text, **but it cannot feature any sentences.**
  - Letters and words are OK.
- Pick one of the following genres for your story:
  - ACTION
  - ADVENTURE
  - COMEDY
  - DRAMA
  - DOCUMENTARY
  - HORROR
  - FANTASY
  - MYSTERY
  - ROMANCE
- Your story needs to feature at least **one type of interaction or motion.** Pick 1 (or more) of the following:
  - :hover and :active states
  - @media queries
  - @keyframes animations
- Upload your finished .html to your student folder in the class Drive.
- If you use any external files in your story, upload those images as well to your folder.

If you're struggling with where to start, check out the links on [the class website](#) for help.

You may also consider using the CSS property "position: absolute" with "top: \_px" and "left: \_px" values for moving elements around. [See a demo here](#).
