

Mahou Arms Known Issues, 0.0.256 - 0.0.257

Known Issues:

- Occasionally Amelia's hair goes crazy during the H-scene.
- There is some flickering when morph targets turn off momentarily during semen painting. This is a low level engine bug; a workaround solution for semen painting will be included in a future build, replacing the current semen painting implementation until the low-level engine bug is fixed.
- Switching between keyboard/mouse and gamepad during the pause menu is not 100% intuitive yet, it doesn't detect mouse movement.
- Censor squares sometimes show up even when completely obscured by something else.
- QTE widgets only report correct inputs for gamepad
- 144Hz is not supported yet, but will be.
