How it Works

How it Works

To correct your vision, this advanced Collamer lens is gently added to your eye in front of the natural lens, and behind the iris, to correct your prescription and have you seeing clearly – without glasses or contacts. The ICL bends the light to focus it perfectly onto the retina, similar to how a contact lens works on the surface of the eye. Unlike contact lenses, it's maintenance-free. It never dries out or gets dirty. You don't have to put it in every morning or worry about it getting lost. And you can't develop an allergy to it over time. Patients tell us they do not feel the new lens or notice it's there, and it's not noticeable to others. Unless you share it with others (and we hope you do), only Dr. Brusco will be aware that vision correction has taken place.

Advantages of the Visian ICL

Visian ICL delivers the best optics of any vision correction procedure because of how it works and its placement in the eye. These precision results make it an attractive option for many patients who simply want amazingly crisp, clear vision. In addition, Visian ICL at Brusco Vision in Washington DC and the DMV, can permanently correct your vision without removing any natural tissue of the cornea, up to a prescription of -20D! If in the unlikely event you need or wish to remove

your ICLs in the future, they can be removed with an additional procedure. Finally, as an added bonus, Visian ICLs contain an ultraviolet blocker that protects eyes from harmful UV rays.

Is Visian ICL Right for You?

The range of patients who enthusiastically choose ICL is diverse and not limited to only those who have been told they don't qualify for other procedures – many of our patients qualify for Visian ICL eye surgery as well as many of our other advanced vision correction procedures such as SBK LASIK, ASA PRK, and SMILE. If you're nearsighted, with or without astigmatism, Visian ICL may be a great option for you, even if other procedures aren't a good match for your unique eyes.

The first and most critical step in determining candidacy for a procedure is to schedule a thorough consultation where a detailed examination with state-of-the-art diagnostic equipment (ANOVA) is performed. This goes above and beyond a traditional LASIK screening – the ANOVA sets the foundation for exceptional visual outcomes with each patient's long-term needs in mind. At Brusco Vision, we like to think one, two, and three decades ahead.

Company Description

Brusco Vision is a boutique-style laser vision correction and refractive surgical facility dedicated to one simple goal: helping you see better to live better.
