

Journal of Institute of Medicine Nepal (JIOM Nepal)
Case Report - Template (2025)

Type of article: Case Report

Title:

..... (10-20 words)

Authors (full names):

Author affiliations : Department, college/organization, address

Corresponding author: Name, affiliation, address, email, ORCID id

Checklist for case report submission
(templates available from journal website)

- | | |
|--|--|
| ☐ Submission letter | ☐ Manuscript - unblinded version |
| ☐ Authorship letter | ☐ Manuscript - blinded/anonymized version |
| ☐ Declaration letter | ☐ Images (if used in manuscript) |
| ☐ Consent form | ☐ Reference file |
| ☐ Manuscript information page | |

ABSTRACT

Abstract word count : words (limit: 100 words, 1 paragraph)

(Abstract is a concise summary of your case report, a mini-version of your paper. It should give the readers a concise, yet complete understanding of your case's significance, presentation, findings, intervention, outcomes, and clinical implications.)

Keywords: 5-10 words

Keyword1; keyword2; keyword3; keyword4; keyword5 (in alphabetical order)

Full text word count : words (limit: 1000 words; 10 citations)

INTRODUCTION

Introduction word count : words (limit: 100 words; 3-5 citations)

- *An overview of the problem that the case addresses, citing relevant literature wherever necessary.*
- *Should end with a single sentence describing the patient and the basic condition that he or she is suffering from*

CASE PRESENTATION

- *Describe the details of the case adequately with the help of 3-4 images*
 - *Patient description*
 - *Case history*
 - *Physical examination findings*
 - *Results of laboratory tests and other investigations*
 - *Management and treatment plan/received*
 - *Expected/Actual outcome.*

DISCUSSION

- *Expanding on what has been said in the introduction, focusing on why the case is noteworthy and the problem that it addresses.*
 - *a summary of the existing literature on the topic.*
 - *the existing theories and research findings on the key issue in the patient's condition.*
 - *narrow down to the source of confusion or the main challenge in the case.*
 - *connected to the existing literature, mentioning the message that the case conveys.*

- *explain whether this corroborates with or detracts from current beliefs about the problem and how this evidence can add value to future clinical practice.*

CONCLUSIONS

- *briefly mention the key points covered in the case report.*
- *give suggestions and recommendations to clinicians, teachers, or researchers.*

CONFLICT OF INTEREST

- *State if you have any conflict of interest involved in the case report and publication.*

ACKNOWLEDGEMENTS

- *Thank individuals or organizations that supported your study specifically; but do not use literary and flowery word.*

CONSENT

- *Mention about consent.*

AUTHOR CONTRIBUTIONS

- *State the contributions from all authors named in the article.*

REFERENCES (Limit 10 references)

- *In case of multiple authors, list only the first three (3) authors and then put et al*
- *Journal names should always be abbreviated.*
- *Include [DOI](#) or [Pubmed](#) or [Full text](#) or [Google scholar](#) or [Abstract](#) or [ResearchGate](#) or [Website](#) hyperlink*
 - o *References without any of these links can not be used by authors*
- *Example reference :*
