Languages: Typescript, Javascript, HTML, CSS, Rust, C++, SQL, C#; **Frameworks and Libraries**: React, Next, Node, React Native, Tailwind, Jest, Vue; **Other**: Git, GraphQL, REST, Figma

Experience

AUG 2021 - JUNE 2025

Helicarrier Development Studio – *Software Developer*

- Worked on several web and mobile apps using technologies including React, Next, Typescript/Javascript, React Native, Node, and more.
- Was tasked with working with stakeholders, designers, QA and backend engineers to bring new features to users
- Worked with customer support and directly with customers to triage and fix user issues and bug reports
- Managed web and mobile app releases, including releasing new app builds to App Stores
- Worked on several large refactors and upgrades that eliminated technical debt and improved app performance and developer efficiency

AUG 2020 - AUG 2021

Crenet TechLabs – *Frontend Developer*

- Worked on several websites and apps for clients using technologies including React, Vue, Javascript, Node, and more.
- Maintained design systems and components
