star wars verses.

- > **default verse.** focused mainly in the clone wars era, where anakin is a general and leads the 501st command. all the while being an un-official jedi master in that he has taken on padawan ahsoka tano.
- > **'what if' verse.** before anakin turns to the dark side, the people around him are quicker to acknowledge the path he is going down. the events through which it happens may vary depending on who i'm writing with, but the outcome of this verse will always be that anakin does not become vader.
- > **leaving the order verse.** in the middle of the clone wars, anakin leaves the jedi order, feeling that he doesn't belong and that he cannot keep pretending that he is able to live by their code. because his leave from the order means he doesn't have a rank high enough to be near the chancellor anymore, he does not become manipulated by sheev palpatine or turn to the dark side. anakin seeks out other ways of learning about the force, to use both the light and dark in balance but not surrendering to either side.
- > **one with the force verse.** follows the appearances of the 'force ghost' of anakin. request only.

other verses.

- > **morden au.** a veteran air force pilot who now works with mechanics and is especially known to do illegal upgrades to vehicles and machines. anakin was taken from his mother by social services at the age of nine, because his mother did not have the finances to give him a 'proper' home in their eyes. anakin didn't understand why being forced away from his mother was better than skipping a meal. he grew up in foster care but was never adopted and when he was old enough he joined the army to prepare for joining the airforce. his mother's death was further motivation not to settle down in a life that could be taken from him. he was fast becoming one of the top pilots within the air force when he was in a terrible accident due to his aircraft not being properly fixed and thus he lost his right arm and had to retire from the force. after learning to live in his new situation he took to his given talent of mechanics.
