NAME:

JIMMY WRECKING

AGE:

22

GENDER:

MALE

OCCUPATION:

EXECUTIVE RESEARCHER

DESCRIPTION

Jimmy Wrecking is a caucasian male, he stands █ cm tall with black hair in a short style with lengths ranging from 0.5cm to 1cm from the base of the head, to the tip of the hair. He has to wear glasses due to his █/█ vision, these are standard lenses with a black rim surrounding them, with each arm having a length of 15cm. He commonly wears a white shirt with a black tie, along with a white lab coat featuring the SCP logo.

BEFORE FOUNDATION

Jimmy Wrecking was born in Portsmouth, England to a [REDACTED] Wrecking, and his father, [REDACTED] Wrecking. During his early life, he has always had a fascination with science, be that in class, or at home. His homelife was stable, both parents had a full-time job and Jimmy was trusted enough to be left alone for most of the time. When he was alone, he would always watch different science documentaries, and play with chemicals found around the house. Once blowing up a small portion of his home. The chemicals used were [REDACTED] and [REDACTED] in a [REDACTED] raito.

Jimmy started school at [REDACTED], in Portsmouth at the age of [REDACTED]. According to his school records, he had always achieved a perfect score in all his science tests, however, he almost failed all his other exams, limiting his career options upon leaving the school. Socially, he was an outcast, always sitting alone during his breaks, reading pages upon pages on scientific studies and alike. He had little to no friends, only having brief talks with classmates about the answers to specific questions on homeworks.

FOUNDATION START

Due to his bad grades at school, Jimmy, left with no other options, took a janitorial job at the foundation. During his orientation to the job, he was informed that he would forget the day he worked due to the sensitivity of information to be found at the facility. After having signed a consent form, he was shown the section of the foundation he was responsible for, the Personal Wing. Upon looking within the storage cupboard inside the Personal Wing, he noticed that the cleaner the foundation uses contained small amounts of [REDACTED]. The same chemical he used when he blew up a portion of his old childhood home.

Upon discovering the [REDACTED] found within the cleaner, Jimmy requested to talk with his superior, as he had an idea to improve the cleaning ability of the cleaning solution. Dr. [REDACTED] overheard this, and invited Jimmy into his office to talk about the improvements that could be made. Jimmy had suggested using [REDACTED] with [REDACTED] in a [REDACTED]:[REDACTED] ratio to produce a tiny explosive reaction, a smaller one than the one used to blow up his own home.

When testing this new solution, Dr. [REDACTED] was flabbergasted at the efficiency of this new cleaning solution, and pushed Jimmy into applying for a Junior Researcher position within the foundation, in which he was accepted gladly. He then got to work proving himself as a Junior Researcher.

JUNIOR RESEARCHER

As a Junior Researcher, Jimmy had shown to possess the researcher mind, asking questions no one thought to ask before, such as “Can SCP-999 fly?”, while not immediately getting topmarks with his tests, he has shown to take great strides in making sure his work is the best it could possibly be.

Below are some of his tests as a Junior Researcher.

[SCP-1025 TEST](#)

[SCP-3078 TEST](#)

[SCP-012 TEST](#)

RESEARCHER

After proving his worth as a Junior Researcher, he was promptly promoted to the role of Researcher, a step further on in his career, having learnt the ins and outs of testing within the facility. With this new Clearance Level, Jimmy has been able to test on more SCP's and widen himself, and the foundation's views on the SCP's at the facility, he has brought upon a newfound knowledge into the foundation and had been asked by Executive Researcher Broda [REDACTED] to join the RTF [REDACTED]-1 when he reached the Senior Level of research.

Below are some of his tests from his time as a Researcher, some were so groundbreaking for the foundation, they had to be redacted.

SCP-1162

[REDACTED]

[REDACTED]

SENIOR RESEARCHER

After many tests for the foundation, and a few that were too secretive for the foundation to leak, Jimmy had brought a name upon himself, and had been promoted to Senior Researcher in no time at all, creating a new record for the foundation. Immediately on his promotion to Senior Researcher, he was approached by Executive Researcher Broda [REDACTED] immediately, to be offered a position within [REDACTED]-1 in which he gladly accepted.

Upon his new role within [REDACTED]-1, he quickly became a favourite of the leader due to his writing abilities, and the scientific method that he followed. Having created more documents to fit [REDACTED]-1's goal, than any other member, he was approved by Broda with a proposal.

EXECUTIVE RESEARCHER

Having only been a Senior Researcher for a while, Jimmy was hesitant in sending in an application to be promoted to Executive researcher, having been pushed by Executive Researcher Broda [REDACTED], he took the plunge and was accepted to partake within an interview. During this time, Broda [REDACTED] was offered a position within the Department of Research as its director, and he accepted it with open arms. Having done his interview with

Department Director Ha [REDACTED], Jimmy was given the role of Executive Researcher. Upon collection of his role, Dept Director Broda [REDACTED] offered Jimmy the position of leader for [REDACTED]-1, due to his outstanding work within the team.

[REDACTED]-1

Upon becoming the leader of [REDACTED]-1, he strived to further the foundation's knowledge on the unknown SCP's, and during his time inside the division, he had created countless experiments and documents to do with SCP-[REDACTED]. During his leadership, Jimmy helped to complete a 2 [REDACTED] page document all about SCP-9 [REDACTED], in which they explored the possibility of having a young SCP-9 [REDACTED] entity, packbond with a MTF unit to assist in containing other SCP, or defending the site from G.O.I.

FUTURE GOALS

While being an Executive Researcher, Jimmy has come to love the administrative side off the foundation, and with his experiences and documents gained from his time within the foundation, he hopes to become a member of the Site Advisor team and has been recommended by the Researcher Department Director to apply to the site administration team.
