

Raven's 2026 Commissions Transcript

Please read my Terms of Service before requesting a commission.

PRICES (USD)	BUST	WAIST	FULL
CLEAN SKETCH	\$10	\$20	\$30
CELL SHADING	\$20	\$30	\$40
FULL RENDER	\$40	\$60	\$80
PAINTING	\$60	\$80	\$120

- ★ **Extra characters** are 50% of base price
- ★ **Complex backgrounds** are \$10-\$20 extra depending on complexity
 - or 25%-50% of base price for **paintings**, depending also on the complexity of the painted background.
- ★ **Paintings:** why so expensive? Unlike my normal style, paintings are usually progressively flattened and painted without the use of layer modes (such as multiply, for shading). This means they take more time and effort to render, and are harder to change easily without having to repaint parts of the art entirely.

My Workflow

- ★ **Commission request**
 - Clients will message me on socials, Discord dms, or through vegan requests for their commission idea with references and information attached about what they want.
- ★ **Sketch & proposal**
 - I will approve the request and then work on a concept sketch of the commission and send the proposal.
- ★ **Approval & payment**
 - Once the sketch is approved, payment is due upfront. I will continue to work on the commission once the payment has been made to ensure that I will get compensated for my work (review TOS for information on refunds).
- ★ **Completion & check-ins**

- After payment I will continue to work on the commission with periodic check-ins at relevant steps of the drawing process to make sure the piece is accurate and changes approved by the client are completed to standard.

★ **Finish & send file (discord or drive)**

- Once the final check in is approved I will send the high quality file through the preferred method and file extension for the best preserved quality.

ALL POC & PLUS SIZE OC'S ARE WELCOME!

The main thing I have noticed when talking to commissioners about their previous experiences buying commissions, are their concerns over how accurately their OCs will be portrayed:

- ★ Skin color and undertones being whitewashed or desaturated and ashy.
- ★ Weight being thinner than references or inaccurate in shape.
- ★ Improper representation of scars or medical devices.
- ★ Hairstyles and hair texture not being accurate or designed.
- ★ Lack of body hair or skin details relevant to character.
- ★ Poor representation of body mods such as piercings or tattoos.
- ★ Improper representation of their culture or heritage.

If these points sound like concerns you have faced when commissioning artists, then you are **FINALLY** in the right place 🍷🍷🍷

I have a background in fine art figure drawings of real people of all shapes and sizes and many examples of my previous works that may represent diversity more accurately than my 10 most popular current fandom characters. 😊

I am happy to take my time getting your OC *JUST right*, regardless of previous experience, so please do **NOT** be shy when presenting your OC and **ALL** of their details and *all their glory!*

I love being able to represent different cultures and ethnicities even if I haven't before, SO *PLEASEEEE* just genuinely give me your OCS!!!! I love challenging myself and am happy to study any references or sources given to best represent your OCs with a proper understanding of their heritage or identity presentation 🍷

Also I love hearing about OCS in general and if I get invested enough I might just draw them again for fun or ask for more info about them in general! I love this part more than anything in the art process 🍷 okay that's enough bye!!
