Mr. Gunstenson
Science 8

CS 8.3 Question Set #1:

1. Why do the cells that make up multicellular organisms need to reproduce? List your reasons.
2. Is a red blood cell more specialized than an amoeba, or is it the other way around? Explain your answer.
3. What are the advantages of having specialized cells? Are there any disadvantages? Explain your answer.
4. Identify the four types of tissue that make up the human body. For each tissue, write one sentence to describe how the tissue functions.
5. In your own words, explain the term "cell specialization."
