

Did You Know...My Disney Career

With the launch of My Disney Career in May, all employees are now able to search and apply for new opportunities throughout the Company globally, all from one centralized location.

This is just the beginning of how you will be able to take control of your career in bigger and bolder ways than ever before. More tools, technology, resources, and features will be rolling out throughout the rest of this year and FY23 to help you own your career, and where you are supported and enabled not only by tools and technology but also by supportive leaders across the organization.

And with all these new enhancements coming and to get current employees familiar with My Disney Career the Digital Marketing Team launched a My Disney Career campaign that launched last week.

Every few weeks, we will be sharing how our employees can take control of their careers through news, facts, and information about the recently launched and improved My Disney Career.

Each story will be distributed on the following platforms:

- My Disney Today
- Newsreel
- The Hub
- Cast TV System
- Belong

And with the help of our IC Partners, teams will distribute these stories to their teams via their established communication platforms like Slack, Teams, and newsletters.

Check out our first story below:
