Link Your Local School and WesternND Infinite Campus Accounts

Student instructions for Campus Student on a web browser or in the mobile app

GOAL: Sign in to your local school Campus Student account, then switch to your WesternND account without entering a second username and password.

Before You Begin

- Have your local school Campus Student username and password available.
- Locate the WesternND account-activation email. It contains the Account Activation Link for your CRACTC/BASC/GWN/RACTC portal account.
- Complete the process in one sitting so the temporary linking code is still available to paste.
- Use Campus Student—not Campus Parent—when linking student accounts.

STEP 1 | Activate and sign in to WesternND

Open the Account Activation Link in the WesternND email. Follow the on-screen prompts to create your WesternND Campus Student username and password, then sign in to the WesternND portal.

Do not forward the activation email or share your usernames, passwords, or linking code.

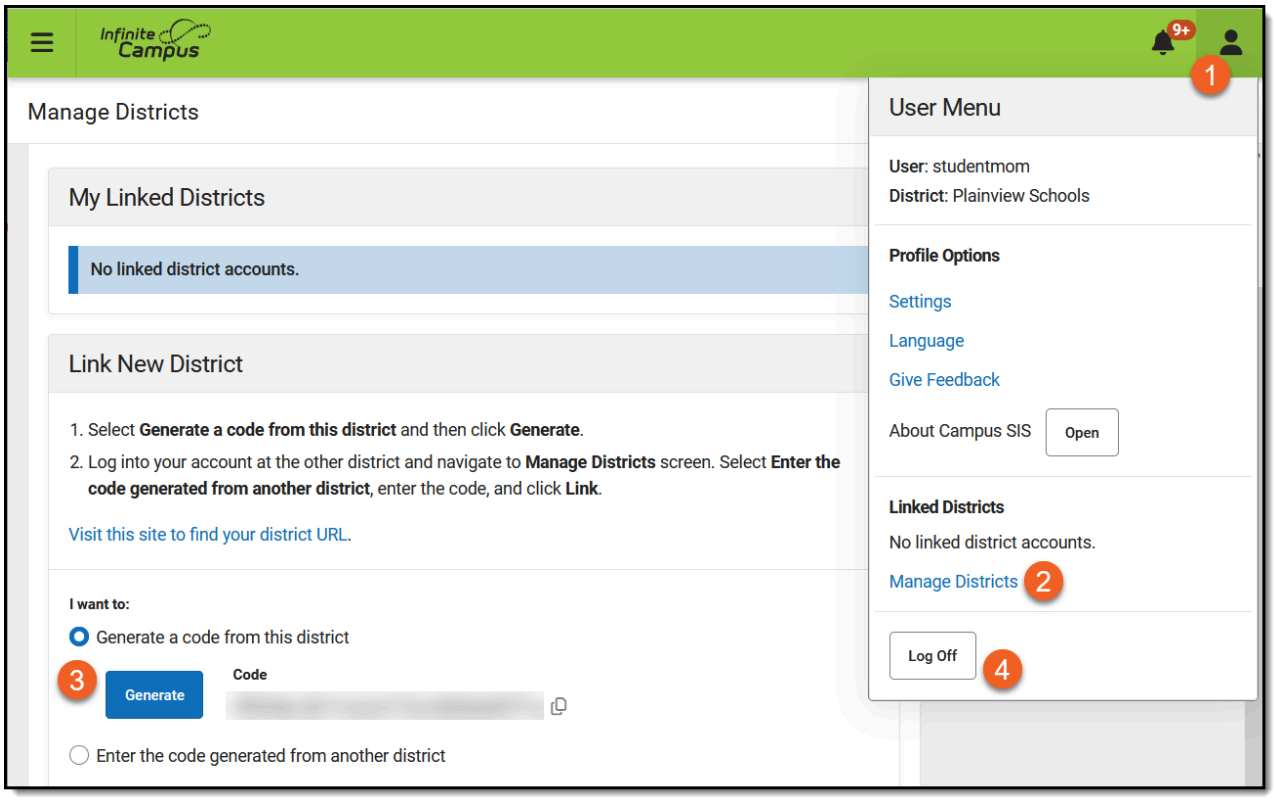

STEP 2 | Open the User Menu

After signing in, select the person/profile icon in the upper-right corner of Campus Student. On smaller screens or in the mobile app, this opens the User Menu as a slide-out panel.

Under the Linked Districts heading, select Manage Districts.

STEP 3 | Generate a code from WesternND

- On the Manage Districts screen, select Generate a code from this district.
- Select the blue Generate button.
- Select the code that appears to copy it to your clipboard. If your device does not copy it, carefully write down the entire code.

Official Infinite Campus example: Generate a code from the WesternND account.

STEP 4 | Log out of WesternND

Return to the User Menu and select Log Out. Do not close or clear your clipboard before pasting the code into your local school account.

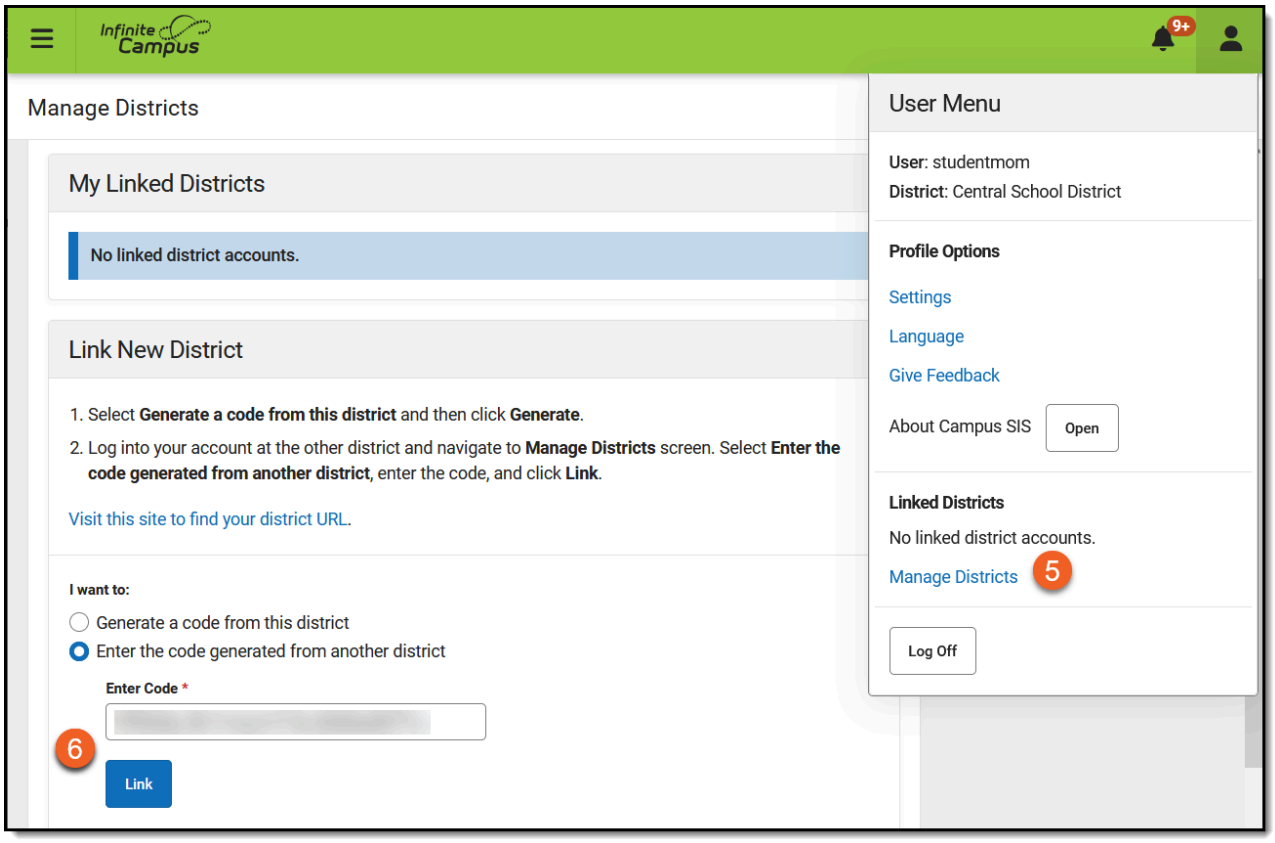

STEP 5 | Sign in to your local school account

Open your local school's Campus Student login page and sign in with your local school credentials. Then select the person/profile icon in the upper-right corner and choose Manage Districts under Linked Districts.

If you do not know the correct local login page, use Infinite Campus's district-search page: https://www.infinitecampus.com/audience/parents-students/login-search. Enter your district name, select North Dakota, choose Search, and select your district.

STEP 6 | Enter the WesternND code

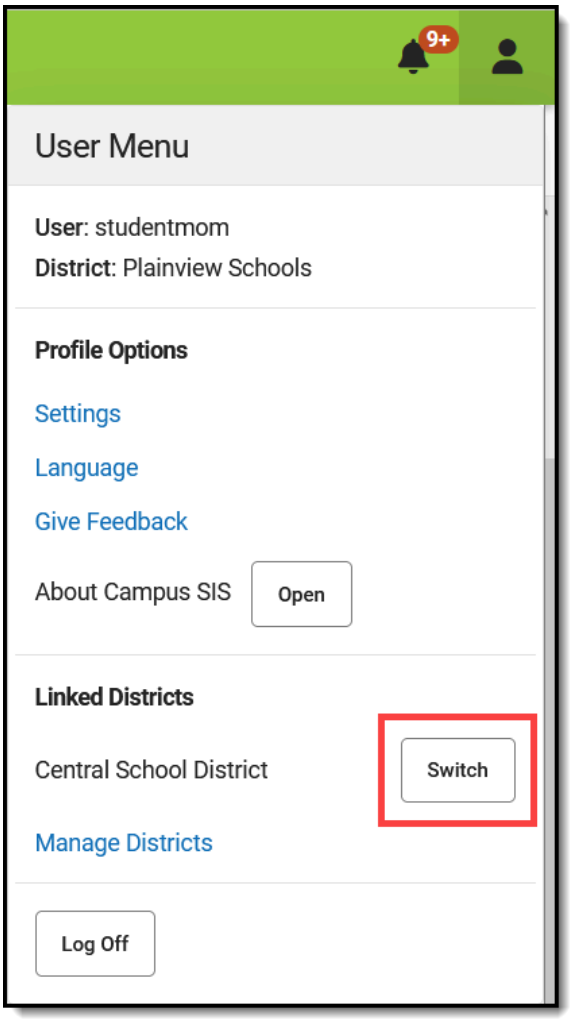

- Select Enter the code generated from the WesternND district.
- Click or tap inside the code field and paste the code copied from WesternND.
- Select the blue Link button.

Official Infinite Campus example: Paste the WesternND code while signed in to the local school account.

STEP 7 | Switch to WesternND for the first time

Open the User Menu again by selecting the person/profile icon in the upper-right corner. In Linked Districts, find the WesternND district and select Switch. The WesternND Campus Student account should open without asking you to sign in again.

Official Infinite Campus example: Select Switch next to the account you want to open.

Using the Linked Accounts Later

- Sign in to your local school Campus Student account as usual.
- Select the person/profile icon in the upper-right corner.
- Under Linked Districts, select Switch next to WesternND—or next to your local district when switching back.
- In the mobile app, switch to each linked account once on every new device to activate push notifications for that account.

If Something Does Not Work

What you see	What to do
No Manage Districts option	Account linking is not enabled for that district account. Contact the local school office for assistance.
The code will not link	Confirm that you generated the code while signed in to WesternND and pasted it while signed in to your local district. Generate a new code and try again.
WesternND is listed, but Switch gives an error	The WesternND portal account may be inactive. Contact WesternND staff to verify the account.
Mobile notifications are missing	In the mobile app, use Switch to open each linked district once. Repeat this after signing in on a new device.
You linked the wrong account	Open User Menu → Manage Districts and select Unlink next to the incorrect district, then repeat the linking steps.
