

## About Whip Cream

You can whip cream using our cream chargers and whipped cream dispenser. Great to make whipped cream desserts mousses and sauces! The available cream whipping products are matching, so you can use the chargers that are for sale here with a 0.5 Litre cream whipper that is also available for sale here.

You can increase the volume of whipped cream more when using cream chargers than when you whip by hand. One 8-gram cream charger whips up to 0.5 litre in weight and 1.5 litre in volume!

We stock all of the major brands (high quality cream chargers) such as BestWhip, SupremeWhip, Ezywhip cream chargers (ezy whip), Whip-it & Mosa cream chargers.

Ask us about super bulk sales prices for wholesale purchase volumes (massive discounts from the regular price) for if you would like to distribute this product.
