

Data Storyteller

The *storytelling with data* (SWD) team seeks someone who shares our passion for data: analyzing, visualizing, and communicating it—and inspiring others to do the same. The right person will relish the thrill of making a great graph or superb slide and has the skill set to do so. They will appreciate beauty...but also the constraints of the real world. If the idea of cultivating in others an appreciation of the art and strategy of effective data storytelling sounds exciting—and the thought of 3D pie charts keeps you up at night—this might be the role for you.

We are looking for an enthusiastic and dedicated Data Storyteller to support SWD's established workshops and related client- and community-facing offerings. You will be self-propelled with unparalleled organizational skills and attention to detail to manage multiple projects with concurrent deadlines. You will have the opportunity to continue to hone your data visualization, storytelling, and communication expertise while sharing learnings with a wide variety of organizations ranging from non-profits and universities to leading Fortune 100 companies.

Role Overview

- **Workshop delivery & client delight:** lead and partner on in-person and virtual workshops, build excellent client rapport, and manage pre- and post-workshop client relationships
- **Analysis & application:** analyze summarized data from a wide variety of industries and subject areas; apply SWD lessons to create illustrative teaching examples and effective data stories
- **Data visualization makeovers:** create visual redesigns of example client graphs and slides taking into account the blended style of SWD and client branding
- **Consulting:** provide targeted support and feedback for clients and community members
- **Content creation:** develop blog articles, community exercises and challenges, podcasts, videos, social media, and other outreach content

Ideal Qualifications

- Minimum 5 years business experience in an analytical role communicating with data
- Quantitative background in mathematics, statistics, computer science, or similar
- Highly skilled at creating graphs and presentations (proficiency with Excel & PowerPoint required)
- Adept presenting in front of groups: confident, poised, and articulate
- Experience leading projects from conception to completion while juggling competing priorities
- Eloquent writer, able to express ideas and concepts in a clear, concise, and compelling manner
- Comfortable contributing to shared content and able to quickly learn new tools and technologies
- Capable of and motivated by working independently, managing own schedule and travel logistics, and working from your own location

Location: work from your own location; must be within reasonable travel distance of a major airport

Travel: approximately 25%, depending on client needs and workshop schedule

Hours: full-time, self-managing your schedule

Compensation: competitive, with opportunity for bonus incentives
