

Writing Assignment Option #8

According to the readings from the week, what social structures and norms around gender exist within the workforce? What barriers or struggles exist because of these? Explain if and how these are gendered or based on other intersections and experiences of those populations briefly. Give at least two specific references or examples from each of the readings you choose that demonstrates that you read and understood the reading.

See Course Information for in-depth [Writing Assignment Guidelines](#) for these options - remember that you must **only** do **four** of these, your choice.
