Hi [name],

Beyond Plastics has just released a new report showing **New Yorkers could save \$1.3 billion** 💰 over 10 years if state lawmakers pass the Packaging Reduction and Recycling Infrastructure Act (PRRIA). This bill is a win for the environment, public health, AND taxpayers' wallets. Among the findings in “Projected Economic Benefits of the New York Packaging Reduction and Recycling Infrastructure Act”:

- **New York state would save \$1.3 billion** during the first decade after PRRIA is enacted.
  - That's \$568 million for local governments, benefiting taxpayers, and \$696 million for private waste hauler services — savings that would presumably be passed down to customers.
  - Two-thirds of the annual savings will accrue to **New York City, which stands to save \$818 million** over the next 10 years.
- **Almost 3.8 million tons of packaging waste will be generated** in New York state in 2025 alone — a weight **roughly equivalent to 10 Empire State Buildings**.
- Of the 1.5 million tons of PRRIA-covered packaging that New York City residents and businesses generate each year, our analysis estimates that **1.2 million tons are incinerated or landfilled**.
  - **All but one of New York state's incinerators** are located in environmental justice communities.
- *More waste recycled, less waste landfilled and incinerated via PRRIA:*
  - New York state's packaging **recycling rate will rise to an estimated 28% in 2035 and 44% in 2040** (from the current 18%) under PRRIA.
  - New York state can expect an estimated **half a million tons more recyclables to be sent to recycling facilities** in 2040 under PRRIA than in 2025.
  - New York state can expect an estimated **2 million tons less garbage to be sent to landfills and incinerators** under PRRIA.
