

THIRD ACT WASHINGTON TEAMS

Power Up!: We want our utilities to transition quickly from fossil fuels to clean energy. We participate in the utility planning process and proceedings before the Washington Utilities and Transportation Commission, and advocate for legislation to speed the phaseout of dirty energy.

Climate Finance: We don't want our money funding the climate crisis. We're pushing the state to divest from fossil fuels, supporting members who want to clean up their finances. and pressuring banks to stop funding fossil fuel expansion.

Democracy: Working with our partner Common Power, we're supporting efforts around the country to elect climate-friendly candidates and also working on key local elections here in Washington state.

Policy: We want laws that support our climate goals. We work with legislators to introduce and pass climate-friendly legislation, and help members make their voices heard.

Coordinating Committee (CC): The all-volunteer CC includes TAWA's co-facilitators, volunteer and communications coordinators, and the leaders of all of TAWA's program teams.

Volunteer & Welcoming: We want to create a vibrant community that allows each of us to connect, learn and contribute. This team connects with new members, helping them to find their place on a TAWA team or engage in ways that feel right to them.
