MONITORING A
RESTLESS EARTH

SPIN Seminars

This is a list of the bi-weekly seminars organized by the [SPIN-ITN](#) PhD fellows. The seminars take place at 16:00 -- 16:30 CEST every second Friday.

Recordings of the seminars are posted on the SPIN Youtube channel:

<https://www.youtube.com/@spin-itn>

(please subscribe!)

If you wish to receive announcements for upcoming seminars, please subscribe to the SPIN-info mailing list [here](#)

Seminar Schedule

23.09.2022: Josefine Umlauf (Universität Leipzig)

Characterising Glacial Basal Motion using AI and Beamforming

07.10.2022: Emma Chambers (Dublin Institute for Advanced Studies)

Low enthalpy geothermal energy in Ireland and the DIG project

21.10.2022: Martijn van den Ende (Université Côte d'Azur)

What is Diamond Open Access? Introduction to Seismica & publishing

04.11.2022: Roel Sneider (Colorado School of Mines)

Maintaining academic wellness

18.11.2022: Claudia Quinteros (Frankfurt Institute for Advanced Studies)

Earthquake Magnitude Estimation from HR-GNSS Data Using a Deep Learning Approach

02.12.2022: Zack Spica (University of Michigan)

Seismology with Ocean Bottom Distributing Acoustic Sensing

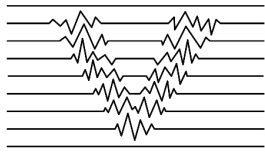

27.01.2023: David Sollberger (ETH Zürich)

Wave type fingerprinting with rotational seismic data

24.02.2023: Giorgos Papageorgiou (University of Edinburgh)

Role of Attenuation in Seismic Monitoring of Injecting Fluids

SPIN

MONITORING A
RESTLESS EARTH

10.03.2023: Sujania Talavera Soza (Scripps Institute of Oceanography)

Global 3D model of mantle attenuation using seismic normal modes

21.04.2023: Nori Nakata (Lawrence Berkeley National Laboratory and the Massachusetts Institute of Technology)

Unraveling Shallow Ice Structure with Active and Passive Seismic Survey at West Antarctica

21.04.2023: Xyoli Perez Campos (Comprehensive Nuclear-Test-Ban Treaty Organization)

The International Monitoring System of CTBTO
