REDT: Selected Entries from Pakapė RCC 1808-1908 Birth Registers

[This Table was last updated on 17 Mar 2018]

General. This Register Entry Data Table (REDT) contains translations / transcriptions of the primary names, dates, and places recorded in *selected* individual entries in the birth registers of Pakapė Roman Catholic church (RCC). Pakapė is a town in Lithuania; it is in the Šiauliai district municipality in Šiauliai county.

Source: Pakapė RCC birth register, 1808-1827 (LVIA record F.669 Ap.1 B.375) [database online], part of Telšiai RC diocese church registers (LVIA record F.669 Ap.1).

Selection of Entries for Inclusion in Table. This Register Entry Data Table contains only a *selected* subset of the entries in the Pakapė RCC birth registers. My primary objective was to include every entry where the parent of a baptized child has one of my ancestral surnames. Additional entries are also included for various reasons. My ancestral surnames within Pakapė RC parish are: *Michnevičius, Petravičius*. Additional ancestral surnames from this area of Lithuania are: *Gruzdys*, *Kanapeckas*, *Karžebavičius*, *Svirtūnas*, *Vaitkevičius, Varpučanskis, Vasilkevičius*.

Languages. The entries in the 1808-1908 birth registers are *handwritten* in the Latin (1808-1827), Polish (1828-1848), or Russian (1848-1908) language. In the Table below: the names of Lithuanian people and places are in modern Lithuanian; any text *transcribed* from the register entries is enclosed in parentheses; and all other information is in English.

"Reverse Translation". In general, except in the Lithuanian-language registers, the names of ethnic Lithuanian people and places were usually "Polonized" (converted into Polish-language versions of the names) by the priests who entered the names in the RCC registers. When translating register entries, Lithuanian genealogists attempt to reverse the original conversion process; they attempt to convert the Polonized names back into corresponding Lithuanian-language names, and they use the surname suffixes of modern Lithuanian. The Lithuanian names that appear below in the Register Entry Data Table have been converted / translated from the Polonized names back into Lithuanian names. This process is relatively straightforward for *place* names and *given* names, but the translation of *surnames* can be highly subjective, and alternative similar surnames are often possible.

Transcribed Text. In the Register Entry Data Table, the names that are *enclosed in parentheses ( )* are the Polonized names as they appear in the text of the original register entries [with some exceptions as explained in the Generic Endnotes to the Tables]. [The general exception: The surnames of the fathers of the baptized children are typically in the Genitive-case plural-form in the Polish-/Russian-language registers, but the *suffixes* of the transcribed surnames in the Table below have been adjusted to show instead the Nominative-case singular-form.]
