Dear {% if user.firstname == blank %}Reader{% else %}{{user.firstname | capitalize}}{% endif %},

The largest financial disruption in history is coming.

\$6 trillion will be on the move over the next 12 months.

In my 30 years following the markets—I've never seen anything like this.

Not only will this disruption create an army of new millionaires...

It will also create the next generation of billionaires.

Now, the safe investment would be to buy and hold Bitcoin.

But that's the **worst** place to put your money if you want the biggest bang for your buck.

Not only is Bitcoin trading at a price that most American's can't afford (\$30,000 a coin)—it's also growing at a snail's pace compared to these more affordable coins.

Just in the last 30 days—as Bitcoin has grown just 7%— I've uncovered coins that have easily outclassed Bitcoin and risen:

- 27%
- 36%
- 48%
- *Even as high as 101%*

These coins are trading at just pennies on the dollar—and offer you a chance to outgain Bitcoin 10 to 1.

Whether you invest in crypto or not doesn't change what's coming.

\$6 trillion is already on the move.

If you want to know EXACTLY how to grab your piece of the pie:
