Instructions for Selfie Video:

1. Find a quiet space with minimal background noise.
2. Face a natural light source (like a window) so your face is evenly lit.
3. Hold your phone at eye level or prop it up to avoid awkward angles.
4. If possible, keep the background simple and not distracting.
5. Keep the video short and focused, 30–60 seconds is usually perfect.
6. Take a deep breath before starting to feel centered.
7. Please speak clearly and at a relaxed pace.
8. Look at the camera lens, not the screen, to create eye contact.
9. Don't worry about perfection, authenticity is better!
