

## Article layout template

### Title of the article

https://orcid.org/0000-0000-0000-0000  **Name Surname**<sup>1</sup>, https://orcid.org/0000-0000-0000-0000  **Name Surname**<sup>2,\*</sup>

<sup>1</sup>Affiliation (Department, Institute, City, Country)

<sup>2</sup>Affiliation (Department, Institute, City, Country)

\*Corresponding author: [email@mail.ru](mailto:email@mail.ru)

**Abstract.** The abstract is a summary of the article for understanding its essence. Volume: 150-200 words in Russian, Kazakh and English.

Structure of the abstract:

- Introduction to the research topic.
- Purpose and main lines of enquiry.
- Description of scientific and practical significance.
- Brief description of the methodology.
- The main results and conclusions of the study.
- Contributions made and practical significance

**Keywords:** 5-7 words or phrases reflecting the main content of the article, separated by a comma.

### Introduction

- Justification of the relevance of the research (justification of the choice, brief description of the problem situation confirming the relevance) [1].

- Review of existing literature and identification of the problem (indicate the need for this research based on the experience of previous researches including fundamental and new publications on the topic under research by local and foreign authors, analysis of these publications from the point of view of their scientific contribution, as well as gaps in the research) [2], [3].

- Aim (or aims) of the research.

### Methodology

- Procedures for conducting experiments, research and (or) statistical data processing (this section provides a full description of the methods used, step-by-step description of the procedure with obligatory reference to normative documents such as ST RK, GOST, AASHTO, etc., used in technical sciences). [4], [5].

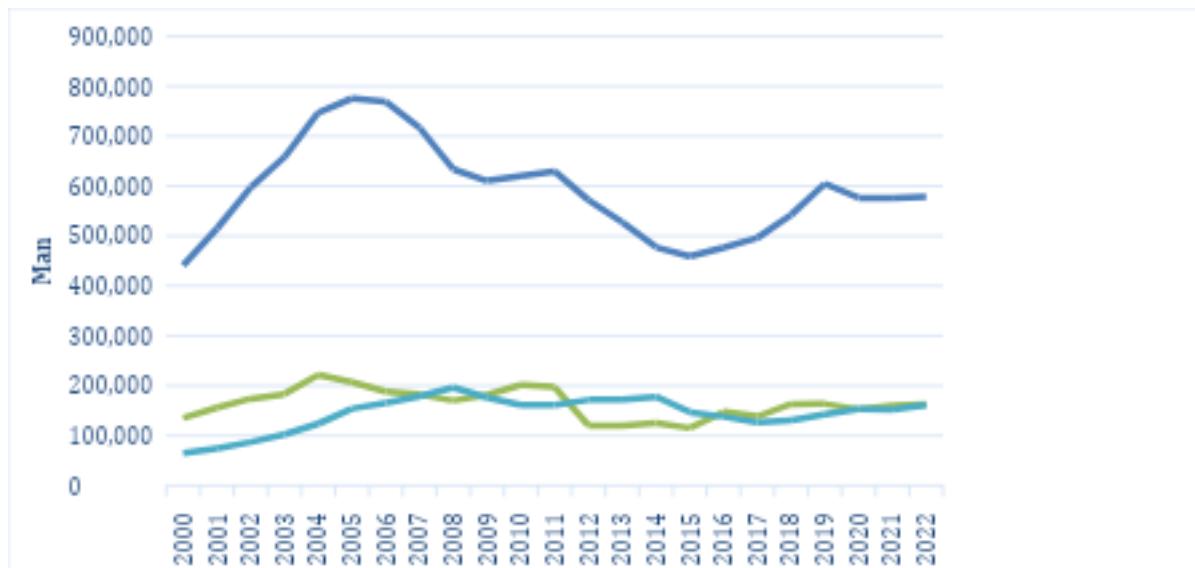

- Resources used for each procedure (identification and characterisation of equipment (software) and materials used).

## Results and Discussion

- Presentation and interpretation of the data and findings (this section presents the key data and findings of the study, analyses them in depth, interprets them and compares them with previous studies to demonstrate the uniqueness and differences of the findings) [6]

- Tables, graphs and charts for visualisation. **Tables should be** included directly in the text of the paper. They should be numbered and/or referenced in the text of the paper. Figures, graphs should be presented in one of the standard formats: PS, PDF, TIFF, GIF, JPEG, BMP, PCX. Point drawings should be made with a resolution of 600 dpi. The drawings should clearly show all details.

**For example:**

**Figure 2 - Example**

**Table 1 - Example**

Column 1	Column 2	Column 3	Column 4
Row	3 683	9 500	25 964
Row	3 500	3717	4450
Row	1 320	2 615	3 176
Row	1 075	1 273	1 247

**Formula: Example**

$$(x + a)^n = \sum_{k=0}^n \left(\frac{n}{k}\right) x^k a^{n-k} \quad (1)$$

where:  $n$  - number;  $k$  - coefficient; etc.

## Conclusion

- A summary of the main findings.
- Practical significance of the results obtained.
- Recommendations for further research.

### Information on the authors (in 3 languages):

Автор 1 - Дәрежесі, Фылыми атағы, Қызметі, Кафедралар, Мекемесі, Қала, Мемлекет, [mail@mail.mail](mailto:mail@mail.mail)

Автор 1 - Степень, Звание, Должность, Кафедра, Учреждение, Город, Страна, [mail@mail.mail](mailto:mail@mail.mail)

Author 1 - Degree, Title, Position, Department, Institution, City, Country, [mail@mail.mail](mailto:mail@mail.mail)

### Contribution of authors (indicate the respective contribution of each author):

Author 1 - concept, methodology, resources, data collection, testing, modelling, analysis, visualisation, interpretation, writing, editing, obtaining funding.

**Conflict of Interest:** Indicate if there is a conflict of interest. Mention any personal or professional affiliations that may influence the review process. If no conflicts, state, "The authors declare no conflict of interest."

**Use of artificial intelligence (AI):** Identify the use of AI in the preparation of the article. Identify how AI was used in the research and writing process. Ensure ethical and transparent use of AI.

After the main text of the article and the list of references it is necessary to give abstracts, titles of the article in two other languages, depending on the language of writing - Kazakh, Russian, English:

## Rules of article design

### Please read and adhere to the following specifications carefully:

- Potential journal authors should follow the following IMRAD article structure rules according to the headings: (introduction (problem statement, objectives, background), research methods, discussion/results, conclusion).
  - The length of the article (excluding title, author information, abstract, keywords, bibliography list) should not be less than 6 pages (3,000 words) and not exceed 16 pages (7,000 words).
    - Ensure that the manuscript is consistent with the purpose and theme of the journal.
    - Customise the manuscript according to the template without changing the format or style.
    - Send the manuscript in .doc or .docx format.
    - Text editor parameters: margins - 2 cm on all sides; width alignment; font - Times New Roman, size - 14; line spacing - 1; paragraph indent - 1 cm; page orientation - portrait.
    - Make section headings bold and centred.
    - Figures and tables should be centred without indentation after the first mention in the text and cited as (Figure 1) or Figure 1, keeping within the page margins.
    - Figure and table captions should be self-contained, descriptive and centred; figure captions should be placed at the bottom and table captions at the top.
    - Multiple figures can be placed in a single row and cited together (e.g., Figure 2 or Figures 3 and 4).
      - To align multiple figures in a row, use an invisible table and centre the captions accordingly.
      - When referring to more than one figure or table, use hyphens and commas (e.g., Figures 6-8 or Figures 6, 7, 8-9).
        - Use at least one figure or table and provide a detailed description of it (trends).
        - Use the standard formula editor for equations, number them as (1) and cite them as Ur. (1) or Ur. (1-3) for more than one.
          - The tool - Zotero (GOST style) should be used to design bibliographic references
          - References must necessarily include scientific papers from the last five years (at least five).
          - For Cyrillic language links, use the online transliteration tool -
          - The reference list should be 12 point font size and aligned to the width.
          - Ensure that the authors' ORCID, name, degree, title, position, workplace, and email are correct.
          - Make sure all funding sources are listed.
          - Indicate the respective contributions of each author.
          - Indicate potential conflicts of interest or declare none.
          - Indicate the use of AI (e.g. ChatGPT) as recommended by COPE or state that no AI was used.
