**March Transportation Report**

- We are still waiting on one more repair estimate for one of our regular route buses (Rt #18) that has a blown/cracked engine.
- The frame rail we ordered last year to replace the one that was cracked on Rt#13's bus has been repaired. We are now waiting for the State Inspector to inspect the bus so we can put it back in service.
- We are entering into a very busy time with all of the spring sports getting started and the number of class field trips increasing. So far we've been able to cover the trips and still drive the regular bus routes in the afternoons despite being 2 ½ drivers short. We are having to double up routes some days but we are making it work.
- We are glad to have Shane McBride back from medical leave. We missed him while he was out.
