

Courses in Medical Coding

The following course options are available in medical coding:

- Advanced ICD-10-CM Code Set Training
- Advanced Neurology and Neurosurgery Coding Course
- Behavioural Health Coding Training
- Dental Billing and Coding with Medical Cross Coding
- EHR and EMR Specialist Course
- Evaluation and Management (E/M) Online Training.
- Home Health Coding Course
- Physical Medicine and Rehabilitation (PMR) Coding
- Skilled Nursing Facility Coding Course
- Anatomy & Physiology
- Medical Terminology
- CD-10-CM
- ICD-10-PCS
- CPT Coding

Syllabus of Medical Coding Courses

The syllabus for general medical coding courses includes:

- Introduction to Medical Terminology
- Anatomy Structure
- Medical Ethics
- ICD-10-CM Coding Manual
- Infections using ICD-10-CM
- Digestive System using ICD-10-CM
- Coding for Pregnancy using ICD-10-CM
- CPT Coding for Reproductive Systems
- Coding for Mental Disorders using ICD-10-CM

Introduction to Healthcare and Medical Coding:

- Overview of the healthcare industry
- Role of medical coders in healthcare
- Importance of accurate medical coding

Medical Terminology:

- Basic medical terminology
- Anatomy and physiology
- Common medical abbreviations

Introduction to ICD-10-CM (International Classification of Diseases, 10th Edition, Clinical Modification):

- Understanding the structure and format of ICD-10-CM

- Coding conventions and guidelines
- Coding for diseases and conditions

Introduction to CPT (Current Procedural Terminology) Coding:

- Overview of CPT coding
- Coding for procedures and services
- Modifiers and their use in coding

HCPCS (Healthcare Common Procedure Coding System):

- Introduction to HCPCS Level II codes
- Coding for durable medical equipment (DME), supplies, and drugs

Insurance and Reimbursement:

- Health insurance basics
- Overview of reimbursement systems
- Claim submission and processing

Compliance and Ethics in Medical Coding:

- Compliance with coding guidelines and regulations
- Ethical considerations in medical coding
- Fraud and abuse prevention

Electronic Health Records (EHR) and Health Information Management:

- Introduction to electronic health records
- Use of technology in medical coding
- Health information management principles

Speciality Coding:

- Coding for specific medical specialities (e.g. Inpatient, Outpatient, HCC, IPDRG)

Medical Coding Software and Tools:

- Hands-on experience with coding software
- Familiarity with encoder tools

Practical Coding Exercises and Assignments:

- Coding practice sessions
- Assignments to reinforce learning

Final Exam and Certification Preparation:

- Review of key concepts
- Exam preparation tips
- Mock exams and quizzes

Professional Development and Networking:

- Job search strategies
- Continuing education opportunities
- Professional organizations for coders
