[OWASP CheatSheet Series](#)

### Rationale

Cheat Sheet Series provide valuable starting point for defining organizational secure coding standards.

### Description

The OWASP Cheat Sheet Series was created to provide a concise collection of high value information on specific application security topics. These cheat sheets were created by various application security professionals who have expertise in specific topics.

## Mappings to Standards and Other Models

### [NIST SP 800-63](#)

#### **Rationale**

SP 800-63-3 is a valuable resource to leverage for setting up organizational policies and standards.

#### **Description**

These guidelines provide technical requirements for federal agencies implementing digital identity services and are not intended to constrain the development or use of standards outside of this purpose. The guidelines cover identity proofing and authentication of users (such as employees, contractors, or private individuals) interacting with government IT systems over open networks. They define technical requirements in each of the areas of identity proofing, registration, authenticators, management processes, authentication protocols, federation, and related assertions.
