

The Website That You Visit Often

ERVINA FEBRIANTY

I have been visiting many kinds of websites all the time but the best website that I always visit is Academia edu. By using Academia Edu, It can help me easily find the materials for my assignment. Academia edu provides journals with different topics that relate with our needs. However, this website is easy to apply with a mobile phone also because we just need an account from gmail. You should not be worried about the contents of journals because the journals are written down by a good informant such as a teacher, lecture, and many researchers. I highly recommend you to visit this journal in order to help you find many papers that most are related with the topic you want. Moreover, you don't need to worry because this website is officially free for us.

RIA ALFAINI

I really like to use Google in general to get information. I can get everything that I want to search. I also browse any websites, but mostly when I need to get more academic information I use Wikipedia. Even Wikipedia just provides general information, it's good enough for me. Another website that I use to get materials is Slideshare. There are a lot of topics that can be used. It's different from Wikipedia because Slideshare provides information in the form of a slide. So it's easier to memorize the materials that we want to get.

NOVI AMALIA

I usually use youtube using my mobile phone to learn several things such as english, because i like to learn by watching and listening, not reading. If I only read the materials it makes me bored and forget the materials in a short time, that's why I prefer using youtube to learn. On YouTube itself there is one website or channel that I usually use for learning. I like watching videos from the Londo Kampung channel. In Londo Kampung channel i can watch many videos that related to english materials such as grammar, pronunciation, vocabulary, synonym, antonym and etc. the reason why i like Londo Kampung channel is because the way David (the owner of the channel) make the content and deliver the materials is funny, and interesting. What makes it funny is that he is so fluent in javanese that people who meet him didn't expect that. Other than that, what makes it interesting is because in his videos sometimes he uses prank methods on native speakers of javanese/indonesian in public places such as malls and parks. He acts like a tourist and asks some people in english and then he suddenly replies to them in javanese or indonesian that makes them confused and laugh. You can check out his videos on this link https://www.youtube.com/channel/UCADZVxC_4omYiNDLcsDoCeg .
