Acknowledgment

The authors would like to express their gratitude to the funding agency and all supporting institutions for their contributions to this research. Appreciation is also extended to those who assisted with data collection, analysis, and technical support, as well as to all respondents who participated in this study. Their contributions were invaluable despite not meeting the criteria for authorship.

Author Contribution Statement

All authors contributed to this study by providing their expertise and insights in the field of Public Health. The first author designed the study and conducted the data analysis, the second author carried out data collection and data management, and the third author assisted in interpreting the results and preparing the manuscript. All authors reviewed, revised, and approved the final manuscript as a scientific contribution to the advancement of Public Health.

Conclusion

This study summarizes the key findings and discussion, demonstrating that the main results support the research objectives. Based on these findings, practical recommendations are provided to guide the improvement of practices or policies related to the study's focus.
