

A few ecstatic groans broke the long silence in the room, and the rapid panting echoed in the room, forming a realistic sense of presence similar to ambient sounds.

"Owner...The little bitch wants to eat your big stick right now. "

The woman on the screen is only wearing a revealing erotic lingerie. The white lace bra wraps the pair of huge breasts. The hanging skirt around the waist pulls down four belts, making the sexy stockings on the thighs more eye-catching. Two The glossy and creamy beautiful legs are slender enough without a trace of fat. They are simply the deadly weapon to seduce men. The calves are firm and even, the thighs are round and have just the right amount of sensuality, and the graceful waist is being coquettishly twisted. The sensual atmosphere rendered to the extreme was brought into full play, and no one would doubt that this woman is a bitch who only knows how to make love.

Of course, all this is only on the computer side. There are countless pornographic movies in Colombia. In this country that emphasizes freedom and civilization, its underground industry is also rich and colorful. What is being shown right now is the pirated version that has been resold by countless parties. resource.

A Zarak girl is sitting in front of the computer, staring curiously at the horrible scene on the screen: a woman is put on a dog leash around her neck, and is being led away on all fours by a masked actor She had seen gentlemen wearing gloves in the park, leading the beasts of the Perots for an elegant walk. At this moment, after overlapping the figure of the woman and the dog, even if it was not the first time watching a pornographic video, the great shock still made the girl uneasy. Consciously covered his mouth.

The Filin woman on the screen wags her tongue obscenely at the masked man in front of her, and Zarak off-screen doesn't know what's so special about making Filin play a bitch. But as the man's crotch suddenly erected a stick, the outline of the deep flesh-colored giant root after coding, which is comparable to a big ham's penis, made the air inside and outside the screen hot.

"Master's dick, so majestic...smelly, i like it...want master's cum...The little bitch has not been rewarded by the owner for a month..."

"You slutty bitch, what else can you do with this mouth besides holding a man's cock? If you want it so much, let me serve you comfortably....."

Listening to the voice from the other end of the computer, the girl swallowed involuntarily. The dormitory was dark, and she was the only one sitting on the bed wearing the uniform of the National University of Columbia, admiring the messy things that were about to happen in

front of her: a woman tried to play a dog to please a man.

The screen in the computer is showing different close-ups of the sexy girl's body at this moment, from the plump and attractive breasts to the skin between the clavicles, which is so white that it makes people trance. The body became more and more hot from seeing these unbearable scenes, and the Zarak girl couldn't help loosening her neckline.

"Here has become...Because of seeing the master's cock, I'm so horny...That's how women are. When they see such a thick guy, their legs can't move. It's all these lewd honey. "

The woman licked her tongue and fingered the moisture-filled hole between her legs with her white skinny fingers. Her legs were spread apart and she squatted halfway on the ground. The camera also focused on her fingers at the right time. The girl saw that One finger parted the tender labia, exposing the bad hole.

"Look at this place, it has become such a flood."

The ecstasy and seductive voice reached the girl's ears again, causing her to tremble all over, her hands couldn't help reaching between her legs, and she followed the woman in the computer to poke her pussy. Her body began to sweat hotly, the blush on her cheeks was hot and attractive, her well-organized uniform became messy, and the ink scent left by soaking in the library for many years was gradually replaced by a lewd smell of sweat. The delicate body kept secreting body fluids, and there were no restless reveries in her head, which made the stimulation she experienced even higher.

"Master, it's so comfortable to play with the pussy like this, but...still not as good as your dick..."

While unbuttoning the uniform, the girl speeded up the frequency of buttoning her pussy. She knew her sensitive zone thoroughly. After all, it was not the first time she had done this kind of thing—When embraced by the lonely night, the girl Zarak I often use these pornographic videos to incite cheap fantasies and desires, to suppress heavy thoughts and sorrows, and to please myself in the dormitory alone. She misses a man who is much older than herself, a man who is afraid that she will never be able to be together in this life.

"PhD...PhD...Honeyberry's pussy is very wet now, do you like it?...If you don't like it, I can...become what you like...ah...Huha...ah...Huha..."

Honey Berry licked her tongue, half-opened her fascinated eyes, and let the hot tears slide down from her eyes, mixed with a little regret and uncontrollable pleasure. She fingered her pussy quickly, her legs in white silk knee socks gradually became tense, and her mind became more focused on imagining the scene of herself having sex

with the doctor.

The material she used to masturbate was still playing in the computer. The woman knelt under the crotch of the man like a dog, licking the majestic penis in front of her with relish, panting heavily while licking, so lewd and exciting. The picture naturally made Honeyberry's nerves and senses more excited. In her mind, she fancied that the doctor was sitting in front of her, stuffing the thick penis into her mouth, while she kept licking the front glans with her tongue. I heard that the most sensitive front end of a man, after being moistened by the tongue for a while, will comfortably secrete prostatic fluid, which is one of the most obvious phenomena that men feel pleasure. Like the woman in the picture, she sticks out her tongue to lick the empty air back and forth, her flushed face is full of shame and ambiguity, and by fantasizing about the genitals of her crush, she is already testing back and forth on the verge of orgasm.

"Little bitch, what are you still licking? Hurry up and suck me, do you still want semen? Hurry up and use your lewd little mouth to eat this dick!"

"Oh oh oh...I got it, master, the little bitch is going to eat the big dick...oh oh oh oh..."

The woman opened her moist lips, and slowly took the penis in front of her that had been licked back and forth countless times into her mouth. As her brows gradually wrinkled, the penis was gradually inserted deep into her throat. She naturally knew how to serve this thing, that beautiful head was pumped back and forth, and the long black hair kept flying, allowing the thick cock to be inserted back and forth into his hole, and the viscous juicy water splashed. She looked at the camera with an expression of extreme enjoyment, as if the man's cock in front of her was her master, and her duty was to do her best to make the master smear her mouth with terrible saliva.

Mi Berry's face was flushed, and the intense sound and picture stimulated her vision and hearing at the same time, fully showing the actress' exuberant sexual desire, and at the same time making the fantasy in her brain more real.

"I really want it...Doctor, I really want it..."

She looked to her side, and there were several sex toys on the bed: a crystal dick to satisfy a lustful virgin's pussy, an expensive pink vibrator, a few vibrating eggs, and a butt plug string made of crystal beads. When she reached adolescence, the former intern also developed a unique curiosity about sex, and the man who was far away and couldn't ask for it made her have an uncontrollable sexual desire, so she had to rely on these for comfort.

Honeyberry licked her lips, and stuffed a few vibrating eggs into her

backyard. The pussy that had been violently pinched just now was flooded with lewd water. As the few vibrating eggs poured into her anus, the continuous vibration made her lewd expression more excited. She took the vibrator and began to stimulate her clitoris. The continuous pleasure was like a tide flooding her. At the same time, the woman in the picture was still performing slow oral sex. She struggled to free one hand to pull the progress bar, fast forwarding to a new scene.

The screen cuts to a toilet cubicle. The woman is wearing a sexy cheongsam from Yanguo, with seductive black suspender stockings on her legs, and her pussy is constantly being fucked by a man. He worked very hard, as if he wanted to poke the delicate hole, with heavy impacts, the sound of love juice splashing and the muffled sound of physical collision one after another, like a symphony of joy and obscenity. Honeyberry once again felt the unprecedented stimulation from the hole to the top of the sky, she directly fast-forwarded to the most intense part, picked up the crystal dick beside her and inserted it into her own hole, the soft rubber glans penetrated a few inches into the vagina, Its thick body fills the petite and pitiful passage of the honeyberry, and its size is not too small for the immature meat hole that has not been treated by human beings. Honeyberry began to thrust herself with it, being careful not to pierce her precious hymen with the crystal cock. As the voice in the computer gradually became louder, the woman's fierce and lustful moans and the man's heavy panting together pushed her pleasure to an unprecedented peak. A tidal current suddenly burst out and flowed all over her body, and she and the woman in the picture ushered in an orgasm.

"Yeah!!! Uh huh...Huh...Huh...Huh..."

She slumped on the bed tiredly, feeling hot and viscous love juice continuously gushing out from her pussy, and the vibrating egg in her asshole was still vibrating diligently, which added a bit of excitement when she was enjoying the aftertaste of orgasm. The illusory sense of satisfaction ebbed, and the feeling of emptiness that came again filled the girl's mind with mixed feelings.

The sounds of sex continued to play on the computer, but her brain blocked it. Squinting her eyes and staring at the dim ceiling, she let her violent panting fill the room. At this moment, the autumn rain, which was as lonely as Rem Billiton, drenched her drenched.

Honey Berry thought to herself mockingly: Indulging in masturbation was originally intended to escape this inevitable loneliness, but in the end it was still a self-deception.

The rising thoughts brought her thoughts back to Rhodes Island, the place that haunted her, the man who kept her awake at night.

"I want to go back...Doctor, can I stay by your side? "

She thought she would be full of excitement and anticipation, but at this moment, she suddenly found that her heart was full of uneasiness and inferiority complex: There are many people who have secretly expressed their affection for the doctor. Will there be someone around him who will be there first? Time flies, time flies, and a thousand days and nights of parting, is the doctor's character still the gentle and considerate she is familiar with?

Inexplicable anxiety made her lie on the bed and think wildly.

"I'm going back tomorrow, don't think about it, really...Honeyberry, you have to be more confident. "

Honey Berry touched her sizable breasts, the round and plump shape, not to mention comparable to those sexy young women, but also more plump and eye-catching than ordinary girls, presumably the doctor will definitely notice her changes.

"Huh, let's go take a shower."

She put away the sex toys and deleted all the porn movies on the computer. After finishing all this, she took off her clothes and walked into the bathroom. A handsome and cute face was reflected in the mirror, and her crystal amber pupils were looking up and down. Honey Berry is not confident about her face. Compared with the fashion girls in Colombia, she doesn't know how to dress up or make up. Even underwear is the most common type.

How can such an ordinary and ordinary girl attract the love of her sweetheart?

The more she thought about it, the worse it became. Honeyberry shook her head, the gray braids hanging on both sides of her cheeks fluttered, her fluffy animal ears drooped, and she fell down with her master's mood. She puffed up and lay in the bathtub in a daze.

That night, she was so anxious that she tossed and turned, unable to fall asleep, and was haunted by nightmares even when she fell asleep.

The next day, Honeyberry boarded the air vehicle back to Rhodes Island. She doesn't have much luggage, and her steps are pretending to be light, but her heart is heavy.

She hoped that the journey would be shorter, so that she could see the doctor sooner, and contradictorily hoped that the time would be longer, so that it would be enough to prepare herself psychologically.

When she returned to Rhodes Island, it was already night, and she saw the land-ship dotted with fluorescent light from the window of the aircraft. In an instant, thoughts of the past came to her mind at the right time, and the feeling of nostalgia made her eyes ache—— She is a student returning home, full of anxiety and expectation.

Bolu was the first operator to greet her, and Feilin jumped into her arms with a cheer, like a reflection of the scene where the two had played together in the past; Furong hugged her intimately, and apologized at the same time—Medical Department Always busy, not many people can welcome her back.

All this is fine, so Honeyberry tries hard not to let herself think, isn't the doctor here? what does that mean? What is he doing?

The personnel officer's voice sounded just right: "Operator Honeyberry, the follow-up dormitory arrangements and related work arrangements, the doctor wants to connect with you in person. Welcome back to Rhodes Island."

Mi Berry's eyes trembled, and she felt unnatural. She nodded falteringly, and then followed her colleagues from the personnel department to the doctor's office.

Pushing open the familiar and ordinary door, the doctor gave orders to the terminal behind the desk as she remembered: "My meaning is very clear, I can't offend the Supervisory Committee for their business, no matter how much profit It doesn't work either... There is no need to directly refuse, let them talk to Yao Knight, Linguang knows the attitude of the Correctional Council best."

"I think I've made it clear, goodbye, goodbye...I have important people to meet now."

Putting down the terminal, the doctor chuckled lightly: "I'm busy with work, sorry."

"Just like before." Honey Berry tilted her head and asked meaningfully

"Just like before." The doctor replied without thinking too much, the joy of reunion drove him to walk quickly towards the honeyberry.

"Doctor, I miss you so much..."

Seeing the person she was most familiar with and cared about, Mibie couldn't control her emotions, her legs wrapped in white silk moved away, and then trot without any concealment, and threw herself at the doctor's open arms without hesitation Inside, tears welled up in his eyes, and his cheek was pressed against the neckline of the other party, constantly scratching his body, like a cute little squirrel. She smelled the aroma of talking on the doctor's body, mixed with the smell of coffee and book pages, which was her favorite and fascinated smell.

After wandering for a thousand days and nights, Dandelion finally landed on the land she loves most.

"Hey, Honeyberry!?"

Zarak's increased weight made the doctor stagger, but he quickly reacted, as if he were a child, he gently stroked Honeyberry's little head, the fluffy animal ears felt good to the touch, and the gray

hair was smooth smooth. Feeling the girl's warm skin almost zero distance, the doctor felt relaxed for a long time, and the unfamiliar soft contours in his arms showed the girl's amazing growth in the past three years.

"Well, Honeyberry, you've gained weight."

"No, no, I have been exercising well according to the doctor's request..." She thought it was the doctor's accusation, and hurriedly stammered and defended, "Even, even if you think I'm heavier, it's still long Taller....."

"What are you thinking about?" The doctor leaned down, and put his face against Honeyberry's face lovingly, "You eat well and sleep well over there, I'm too happy to be happy, I'm afraid you're under too much pressure... "

The girl's cheeks warmed up quickly due to the approach of her crush, but at the same time she felt shy, the loss was also smoldering in Miberry's heart: she originally hoped that the doctor would show a picture of the difference between men and women, but that gentle tone, obviously still when she was a little girl.

The dormitory was quickly arranged. She returned to the room with her luggage. The cells in her body were exhausted after tossing. She took off her clothes and looked at this room, which was much smaller than the university dormitory. Suddenly, a flood of memories came to her mind. .

Zoe Burris's misfortune is a common occurrence in Rhode Island, but that doesn't make suffering something that victims can laugh about. After being expelled from the village as an infected person, in order to keep his wife and daughter alive, and even return to the village one day, Mr. Burris tried his best, but he lost time with his family because of this. The year Teresia died, Mr. Burris, who had been loyal and honest all his life, also embraced death in despair. He left only a small amount of food for his sick wife and young daughter, and "infected people" family" infamy. Relying on diligence, intelligence and luck, the mother and daughter depended on each other until Mrs. Burris became ill from overwork, and the burden of life gradually fell on little Zoe alone. She was forced to leave the familiar forest, and used the knowledge of herbal medicine taught by the woodland to take risks in the maze called "City", until she was lucky enough to be discovered by Rhodes Island and successfully became the operator Honeyberry.

"Um... Doctor's appearance..."

Honeyberry will never forget the day she first met the Doctor. The man didn't seem to care about her herbal knowledge, and spent a whole noon introducing Rhode Island's canteens to her. At the end of the

long lunch time, the doctor could not hide his concern and said: "Eat more, child, eat something nutritious. I believe you will take good care of our patients, but you must take care of yourself first." good."

The doctor couldn't help but patted her head, and gave her the care she dared not expect: "I sincerely hope that Rhodes Island can become your home, Honeyberry."

Perhaps because of the racial characteristics of this Zalak, Honeyberry still likes the feeling of jumping off. She can always land steadily, or fall into the arms of friends and family members. Soon after Honeyberry joined Rhodes Island, Thin Green became the person who caught her the most times, while the Doctor came in second. Every time, the doctor hugged her firmly like catching a cute little animal, then touched her head, and then put it down gently.

Honeyberry dared not tell anyone that she was infatuated with the doctor's arms for no reason, and the warmth he showed in every move was a drug that blindly made her addicted.

"If I think about it any more, I won't be able to fall asleep again, but when I think of the figure of the doctor, I can't help but think about it...."

Honeyberry tossed all night and finally fell asleep. The work arrangement on the second day was unexpectedly easy: the R&D center had a simple connection with the newly promoted herbal medicine consultant; Furong was planning to improve the nursing and rehabilitation capabilities, and Honeyberry would be the planner and the counselor of the psychotherapy team. The leader got involved, but Sarkaz, who was supposed to have a small meeting with her, couldn't get away from the emergency surgery, so she had to let Honeyberry visit the medical department by herself.

She wandered around the ward, looking at the new batch of interns, and couldn't help but recall how she was when she first came here. At that time, her medical experience was not yet in line with the norms of modern medicine. The format of her first prescription was all wrong, and the prescriptions were all kinds of herbal medicines. In the end, her seniors thought it was nonsense and a dispute arose.

That time she stood in the corridor and almost cried, but happened to be seen by the doctor. She held back her tears and dodged her eyes, but the other party quietly leaned beside her, didn't ask what happened, just handed over the handkerchief to let her go. She wiped the corners of her eyes.

The doctor is the kind of person who is willing to follow her emotions. Honey Berry thought he was strange at first, but gradually, she found that such company was just what she needed. She didn't want others to worry about her, and the doctor's actions made her feel

trustful. He believed that he could adjust his emotions, so he just handed over the handkerchief.

"Doctor, thank you..."

On that day, she used her own experience to explain the meaning of the prescription and solved the misunderstanding of the senior, but the other party did not apologize to Honeyberry in the end. At night after the dust settled, she came to the doctor's office unconsciously and confided her grievances to her. They talked a lot that night, and the doctor dutifully acted as a listener and accepted her fragile and sensitive emotions. This made her dependent.

Mi Berry looked away, and quietly left the medical department, recalling every bit of her experience with the doctor along the way. At some point, she has gotten used to being by the doctor's side. In the spring, she served as an unofficial assistant to the doctor, often staying in the latter's office all day to study, and sometimes handling simple official duties for the doctor.

In summer, the lazy air is always hot and humid, and the girl's mischievous nature is exposed as she and the doctor get acquainted. From time to time, she went to the convalescent courtyard to be lazy, and the floral fragrance on the corner of her clothes revealed her whereabouts earlier than the message sent by the perfumer to the doctor, but in the end she would always return to the doctor's office: whether it was reading or resting, it was better than admiring Those blooming flowers are not as good as being around the doctor.

The doctor's doting and pampering to her is obvious, and he just turned a blind eye to her lazy behavior—years later, when Honeyberry would unconsciously imitate the perfumer's expression and words when taking care of patients, she Only then did I understand that the doctor's indulgence to her was not entirely out of doting.

She tried to invite the doctor to have a gathering after get off work, but unexpectedly the other party readily agreed. That night they huddled together in a small room to watch a movie, Zarak blushed because of simple physical contact or inadvertently met each other's eyes, and the focus of the conversation shifted from work to life.

After that, Honeyberry began to be around the doctor all day long, sometimes as his student, sometimes as his assistant, and as a friend after get off work.

Once, she wanted to change the taste of coffee for the doctor. After consulting a few noble-born operators, she was still not sure about it. Finally, she chose a relatively unpopular Bolivar coffee to give to the doctor, but the doctor unexpectedly liked it. . It's just that on that day, Honeyberry, who accidentally drank the same cup of coffee with the doctor, also blushed for a long time because of it.

Another time, as she was not familiar with electronic products, she was unable to modify the format of the paper on a large scale, and it was the doctor who extended a helping hand to her. For this reason, the doctor stayed up late and worked overtime for several consecutive days. Mi Berry watched him modifying the format and giving pointers to the content of the thesis beside the man. She was ashamed, but also uneasy and happy.

Gradually, Honeyberry found that the doctor had already integrated into her life, and when the schedule in her mind was full of the figure of the other party, a trace of throbbing emotion emerged spontaneously.

But at this time, the doctor said to her sincerely that he hoped that she would go to Columbia to study abroad and study her most potential psychology. She was born with a delicate mind, even to the point of being sensitive. Her first reaction was to think that the doctor was going to drive her away. She was depressed and bored in the room, and finally realized that it was for her own good. Now she cannot stay where she is. Stepping, you must become better in order to stay by the doctor's side.

So she agreed, with reluctance and anticipation, the doctor left her in the office of the two when they parted, and told them about trivial matters as usual. She nodded and looked into the doctor's eyes seriously, but gradually realized that the other's eyes It is also mixed with reluctance. At the end of his speech, he was a little moved, and he couldn't help kissing Miberry's forehead. This action made Miberry's face turn red all of a sudden, and she completely forgot what the doctor told her just now, and only this kiss remained in her mind.

During her first month in Colombia, she had been wondering about the meaning of that kiss. The hazy love can't find a destination, and at the age of twenty-eight, she falls into a rare puzzle in this world—there is no girl in this world who is more anxious than her.

With the gradual accumulation of knowledge, her understanding of herself has also increased day by day: she lacked the love of her father since she was a child, so that when the doctor inadvertently filled the position of her father, she couldn't help but regard him as the most important relative. The doctor maintains sincere trust and unreserved attachment. However, as the man closest to her in adolescence, the doctor's maturity and gentleness, knowledge and self-cultivation fascinated her even more. The hazy family affection was replaced by a hotter feeling, and getting along day and night made the buds of love break out. .

At first she wanted to avoid this relationship, but she was fascinated by the hormonal agitation in her body between maturity and

youth, and Colombia's emphasis on open and free culture. For the first time, she fantasized about the moment when the doctor masturbated to the climax, and she felt like a bird flying to the vast sky, and like a lost traveler falling forever into the bottomless abyss.

She understands that some feelings cannot be trapped.

The mountains are far away, the sky is high, the water is cold, and the acacia maple leaf is red.

Due to the distance, Mi Berry began to communicate with the doctor. She wanted to stay with the doctor and share her life in another way. This almost became the motivation for her to persevere in Colombia. Local life, always feel lonely.

"Okay, now I'm back, Doctor..."

Honeyberry holds a cup of coffee and sits in the unoccupied lounge looking at the floor-to-ceiling windows beside her. The warm sunlight pours down on her body, making her refreshing uniform more dreamy. The light is broken down by the glass, as if The halo of the rainbow outlines her mature and attractive figure, hasn't the doctor realized that she has become different?

She took a sip of her coffee, as if she had made up her mind.

After finishing his daily work, the doctor lay on his back on the sofa in the office and closed his eyes to meditate. The sound of footsteps followed the sound of the door opening, and as soon as he opened his eyes, he was attracted by a cute figure: honeyberry walked in, bringing a cup of fragrant and delicious coffee.

"Doctor, I remember you have always liked this taste."

"It's true, I haven't had a drink for a long time since you left."

The doctor's expression looked a little surprised, he took a small sip, and looked at Honeyberry's body from the corner of his eye, when his eyes swept over her breasts, he suddenly realized that the raised outline was quite different from the past. The girl's breasts are already quite large, and their alluring shape is the same as the huge jade balls of mature ladies, which has a kind of charming charm. What's more terrible is that the girl's neckline was not fastened, but the white and tender skin was exposed, and the cleavage exuding milk fragrance was majestically exposed in front of her eyes, shaking slightly with her body movements.

He felt that his gaze was obscene, and Honeyberry was like a daughter in his heart. After taking a deep breath, he used the coffee stall to continue reviewing documents to distract his attention, but who would have thought of a careless , the document on the table floated to the ground, Miberry Beast's ears trembled, and immediately turned around

and squatted down knowingly, ready to pick it up.

At this time, the doctor regretted that he couldn't look back. He was too focused on avoiding seeing Mimi's breasts, but he ignored that she was wearing a very short skirt today.

Honeyberry bent her knees, and her skirt gradually lifted up following this movement, revealing the charming spring light at the base of her thighs. A pair of off-white underwear wrapped her soft buttocks. The delicate, soft and elastic skin texture made people want to bully. She exudes the unique temperament of young girls. Girls in this age group have a special attraction. Their immaturity and innocence have not completely faded away, and their protruding curves endow them with a bit of seductive charm that only mature women have. The doctor knew he was reacting.

Regarding her disappearance, Honey Berry didn't seem to know anything, because the squatting action made the panties and the pubic mound close together, which also drew the girl's soft and full mussel mouth outline, the doctor's pupils trembled, and saw the There was a sexy slit in the plump lips, and the off-white fabric seemed to have a dull water stain. The doctor didn't dare to look down, feeling guilty, so he could only look away.

The next time was almost torture for the doctor. Honey Berry still had that innocent look, as if she was still that little girl, sitting beside the doctor, holding her arms, not caring at all that her soft breasts were clinging to the man's arms.

"I feel like the doctor is avoiding me because what I'm wearing today doesn't suit the doctor's taste?"

Honey Berry blinked her eyes, and whispered in the doctor's ear in an ambiguous tone. These words made the doctor's brain inexplicably excited. The sexual desire for women was extracted from all kinds of unbearable fantasies, and he felt that his breathing was a bit heavy. The doctor found a reason to temporarily get rid of the entanglement of honeyberry. He tried to calm his mind in the toilet cubicle, but found that the thing under his crotch was extremely hard. The irreversible physiological reaction brought about by the unprecedented temptation, he shook his head: For Miberry, he has always regarded it as a daughter, and if he has sexual desire for his daughter, is this a beast or something?

But he couldn't calm down when he thought of the obscene scene where Honeyberry stripped naked in front of him with her delicate and charming body. Sometimes being flexible is not a good thing, it will operate subconsciously before reason,

For example, at this moment, the doctor instantly conjured up the picture of himself hugging honeyberry to bed and preparing to have sex.

One day later, when he got up early and came to the office, he met Honeyberry wearing a light shirt and watering the green plants in the room. I thought this would be the beginning of an ordinary day, but the girl accidentally spilled half a basin of water on her body.

The wet white shirt completely lost its covering function, clinging tightly to the girl's thin arms and flat belly. What makes the doctor unable to take his eyes off the most is the two lumps of plump soft flesh contained in the lace bra. The smaller half of Xuefeng is exposed in front of the doctor's eyes. With the honeyberry pretending to cover it, it is actually holding it up and swaying seductively. As if to seduce the doctor to reach out and pick it.

Not to mention that Mi Berry carefully prepared light makeup that day, her skin was fairer than usual, showing off the tenderness of cherry red lips, and her amber eyes were crystal clear, telling the story of innocence, so the doctor could never be sorry for this small mistake. She got angry - instead, the doctor aroused intense desire in an instant, wanting to press the cute and cute girl like a lamb under her body, fuck her innocent virgin pussy with a penis, and ravage both of them with both hands. The lump of snow-like breasts and flesh made the cherry's small mouth unable to utter other sounds except for the words of submission and lewd screams.

But how could he do such a thing? That was the little Zoe who he grew up watching like a daughter!

"Doctor, yes, I'm sorry..." The girl approached him, ostensibly to grab a tissue from the table, but her straight thighs under the short skirt quickly rubbed against the man's.

The time for the battle between heaven and man is fleeting. He forced himself to carry out the next step with the cold thinking of commanding the battle. First, he handed over a tissue to let Honeyberry dry himself, then stooped, sneaked back to his dormitory like a thief, and brought back two men's clothes for Honey berries for a change.

"Thank you doctor, I have troubled you." Panting heavily, she returned to the office, seeing Miberry take the clothes and ready to take off in front of her, the doctor hurriedly ordered the girl to hide in the curtains to change.

"The doctor's words... I don't care." Honeyberry buried her head in the man's loose shirt and tilted her head cutely. "After all, you are special."

"My favorite little honeyberry..." the doctor said helplessly, "I have nothing to say, I'm afraid that if some operator comes in later, I won't be able to wash myself off with Kjerag's snow water gone."

In the days that followed, it was hard to say that there was any improvement compared with that day. The doctor can get a little bit

of beauty from Honeyberry every day. Sometimes Honeyberry will come over sweaty, scratch the doctor's arm with the pair of soft breasts, and start to ask some explicit questions: for example, does the doctor have any girls he likes? , Do you prefer legs or breasts, or what style of stockings or underwear do you like, and then she talked about how she has not been in a relationship for three years after studying abroad, and sometimes she also hopes to be tired of acting like a baby by her lover.

"If you were a doctor, which part of me would you like? The mouth or the stomach, I like everything about the doctor, including there."

"You ask where it is, of course it's the chest...For the first time, he held my body firmly, and it was still so warm, how can people not like it? "

Honeyberry's figure is very attractive, every time it is posted, it is both physical and psychological stimulation for the doctor. A certain change happened like a drop of water: the doctor has convinced himself that he no longer thinks it is some kind of sin to get an erection on Honeyberry; sometimes he sees her walking with the male operator, even though Honeyberry maintains a normal social relationship with the other party Even the distance, a slight unhappiness will also linger in his heart.

The authorities are obsessed with onlookers, and the doctor who treats Mimi as a daughter wholeheartedly does not dare to say whether Mimi really has feelings for him, or whether Mimi's trust in him is beyond imagination, and those ambiguous and out-of-the-ordinary behaviors For the girl, it doesn't mean some kind of sexual suggestion—he self-consciously attributed the latter situation to the open atmosphere of Colombia, always thinking of keeping a distance from her, and finding an opportunity to have a good chat with Honeyberry.

"Does the doctor not like me? I always feel that I am hated by you."

Once the topic got a little bit on the right track, Honey Berry showed a delicate appearance, and he immediately denied it with distress. Her soft and numb voice was almost foul, and her cuteness was mixed with a little charm, teasing the doctor from time to time to suppress his impulse heart of.

Ultimately, he didn't want to ruin a relationship that had lasted for years. Honeyberry is the child he watched grow up, and seeing her achievements on the ship, the pride always comforts him, and it also allows him to ignore his possessive desire for Honeyberry's real existence.

On an ordinary day, the Sakotas held a party in the name of a religious festival—or was the party just one of their religious rituals? Honeyberry was not interested in this question, she just

huddled in a corner by herself, drinking Coke and whiskey to herself casually.

Her enthusiastic invitation was once again rejected by the doctor.

"Obviously I hinted like that, why didn't you respond to me once? Is it because I was hated?"

Months of offensives had yielded no results, and Zarak was smoldering with depression. The noisy voices of the operators could be heard in the cafeteria, and she vaguely recalled that when she was studying abroad, she saw carnivaling peers in the corner of the university cafeteria. At that time, when she raised her head, it was the hustle and bustle of youth, and when she lowered her head, it was the insight of an academic leader.

The fun is someone else's, she has nothing.

She said to herself, it doesn't matter, she can have nothing, she already has nothing - as long as her mother is healthy and healthy, as long as the doctor is by her side.

No one taught her that drinking is just to numb herself, and alcohol can't shake off the clouds.

"Several times I missed the last step, as long as I get closer, I can kiss him, but why..."

After a few gulps, she was so drunk that she was dizzy and staggered when she walked, all of which happened to be caught by the doctor.

"Miberry, why are you blushing, have you been drinking?"

"PhD...PhD..."

Honeyberry was coquettish, and tightly clenched the doctor's sleeve. Even in this state, she still subconsciously wanted to get close to him. The doctor obviously couldn't ignore him as usual. For the purpose of sobering up, he brought Honeyberry to the office.

"Doctor, why do you always avoid me, is it true...Hate me?"

She limply leaned against the doctor, and the seductive body fragrance on her body was floating in the air through the thin clothes. The doctor heard her panting heavily, and her skin and face gradually became hot. This appearance made him unable to calm down with no distractions.

"Silly boy, you are one of my... most valued operators, and I have never hated you."

"Doctor, I..." The girl lowered her head and remained silent for a moment, like a volcano about to erupt.

The man suddenly realized what the operator he regarded as his daughter wanted to say. He wanted to interrupt, but he was a step too late

"Honeyberry..."

"I like Doctor. Me, what I care about most is you, I'm afraid you will leave me..."

Honeyberry used actions to replace words with the help of alcohol. She clamped the doctor's palm on the inner thigh, pressed half of the other's body with the weight of her whole body, her soft face was pressed against the other's shoulder, and the fluffy animal ears brought an itchy touch, all of which made the doctor's heart ache. While sinking, the penis spontaneously congested and erected.

"Honeyberry, stop."

"I know, you are much older than me, and you spoil me like a father, but I don't want to just be your daughter, I'm very greedy..." She stretched her cherry lips to the man's ear, using all her charm : "Father, I love you as a woman."

"Is the doctor excited? My body is completely different from when I left. Do you want to touch it?"

"Miberry, let go, I can't accept this relationship."

She pouted and clamped the doctor's arm with her soft breasts. The hot and humid milk trough exuded a rich aroma. Perhaps because of tension, each other's bodies became hot and sensitive. Due to the magnification of the senses, the doctor even had honey berries Every heavy gasp was unbearable.

"But here, the doctor doesn't think so,"

She stretched out her hand and gently touched the doctor's crotch. The penis, which was swollen with blood, was trying to show the quality of the underpants' value for money.

"Perhaps even you can't fully understand my life before I came to Rhode Island. At Ram Billiton, my life has never changed drastically. The ore disease is like a blunt knife. The person I pulled out of that quagmire is you."

Honeyberry rubbed the doctor's crotch while telling her sad past.

"Even my biological father never stayed with me for as long as you did, showing me the direction of the future. My disease is falling in love with you. This disease is my own fault, and there is no cure for it."

"I thought about cutting off this relationship - taking advantage of your doting on me, having a status almost like a daughter is not enough, your honeyberry is a brazen woman. But in those lonely days in Colombia, I only had fantasies I can only fall asleep when you are next to me. I remember masturbating with your voice and body temperature, using those toys to simulate your cock, driving myself to orgasm, and finally watching those porn movies, dreaming of you loving me..."

The honeyberry began to grind with its legs between them, and the light fragrance in the air seemed to be stronger. The doctor swallowed, and closed his eyes in pain.

"Doctor...Father, please give me a chance to repay you, even if it is

an unnamed underground lover, it doesn't matter, as long as I get a moment of tenderness from you, I will be satisfied."

Rhodes Island has received many minors, as patients, and even as operators. More than once, the doctor took over the skinny children from the mothers of the dying infected patients who dared not trust any strangers. He knows better than anyone that what Rhode Island did was not out of madness, but because of helplessness—Rhode Island cannot reverse the disaster that brought the children to this point. Let the disaster not continue.

Let the disaster not continue, that's why he dotes on Honeyberry like his own daughter, and it's what he has to do now.

He began to speak, neither too fast nor too slow, and each word was clear, though every syllable he uttered was a pain that burned his body like fire: "If I am really your father, Then I should be a very failed father. But if I still refuse you, it will only make me fail even more."

Honeyberry hugged the doctor's arm even tighter. She never thought that her rash confession would cause the doctor such pain, so she had to explain to him: "This is not your failure or mistake, it's all because I fell in love first..."

The doctor dragged Zarak to him, and forced Honeyberry to sit on his lap in a duck-sitting posture—looking at the girl who was almost at the same level as him, and once again realized that the other party was already a big girl. share guilt.

"I was just thinking, even if I knew everything would go to where it is today, would I be able to bear it a few years ago? I couldn't do it. I still can't help but introduce you to the cafeteria and tell you to eat and sleep well Well, you were still a little kid back then..."

He tried to change his mind, to appreciate the carcass in front of him as he viewed his lover instead of his daughter—and realized with shame that this transformation had been unbelievably easy for him.

The doctor sighed for the last time tonight: "If I am destined to teach you badly, then I should at least be responsible for making you happy... You know me too well, my daughter."

Amber stared at the changes in the doctor's brows and eyes, and her sensitive thoughts correctly captured the doctor's implication: what made him feel the most pain was not his own sick Electra complex, but her skillful use of the doctor's favor, In the end, they weave a web of fate that entangles them tightly.

She hugged the man's body, rubbing her breasts against the doctor's chest through the clothes: "Father, I'm sorry. I, I assure you, I will not let you down, whether as your operator, your woman or your daughter."

"I believe in you." The doctor's tone has returned to the usual calm, and those vague pains have disappeared like illusions, "Honestly speaking, let me look at the good daughter I cultivated by myself and the bad boy who doesn't know which family. When we get together, I feel bad."

Honeyberry was pleasantly surprised to find that the doctor's big hands had reached into her skirt from bottom to top, kneading her plump and round buttocks like licking oil. The long tail couldn't help swaying, and she offered a kiss to the doctor: "There will be no such thing, Dad, everything about my daughter is yours."

"My dear daughter, do a few things for Dad." Thinking of those obscene fantasies about honeyberries that were about to become a reality, the doctor's sense of immorality made the doctor both painful and excited, and he continued, "Lock the door. Pray that you can Angel's party can attract enough operators, and then get daddy's bottom wet, or you will cry later."

"Everything is up to you."

Honeyberry locked the door of the office in three steps and two steps, and then walked back to the doctor.

With a "crash", light fingers pulled off the zipper on the uniform, revealing the pair of soft and sexy breasts on the chest. The clothes slid down to her feet. Shaking slightly, the pink and attractive nipples at the front were exposed to the air, causing the doctor's pupils to shrink and his breathing to become rapid.

As a matter of course, his crotch is already very firm, and the tent that he propped up may be able to stuff a cat in. Honeyberry squatted down, unzipped the zipper of the doctor's crotch, and released the long-dream cock.

"good...so big.....I didn't expect my father's place to be so majestic, huh...smells so good is this daddy's cock...I really want to eat it, huh...Huh....."

Honeyberry panted heavily with dazed eyes, leaned up like a kitten, and kept sniffing the scent with her nose. The hormones and slightly wet semen smell made her very excited. Dad's penis was not very fragrant, but she liked it very much. The pupils of the eyes glanced up from the root, the thick stick was wrapped with fierce veins, which was much more exaggerated than the size of the cock she had seen in pornography, this size was too big for her petite virgin pussy .

"Dad's cock, I like it so much, my daughter will definitely take care of it...As punishment for getting daddy hard, let your daughter lick your here right now. "

Honeyberry sticks out her tongue, licking the flesh-colored ice cream bar under the doctor's crotch as if tasting delicious ice cream. The

wet and hot tongue flicked back and forth on the glans, while kissing the bulging meat mushroom, sucking the sticky prostatic fluid on it, the animal ears on the top of her head stood up excitedly, and the red face vented her desire for this dick like. It didn't linger for too long, just like an irrepressible sexual desire surged into her heart, she swallowed the front of the cock in one mouthful, the wet and hot mouth was mixed with sticky saliva, and wet the extremely hard glans, the doctor immediately felt refreshed Looking up, I felt that I had been inserted into a honey nest full of nectar.

"Ugh...Ugh...woo woo...Ugh...Huha...ha ha ha ha..."

Honeyberry let out a series of seductive gasps, she took the doctor's penis in her mouth, and kept licking it with her tongue in her mouth. Rusty blowjob movements are enough for foreplay.

"Do you just like Dad's cock so much? You didn't grow this small mouth just to eat it."

"I can't help it, who is called someone, who likes Dad so much?...In Colombia, I masturbate every night thinking about you..." Honey Berry raised her head to look up at the doctor, her pure and lovely face was close to the plump red glans and the raised blood vessels under the brown-black skin, the strong contrast was striking The doctor was even more passionate, "Now please enjoy your daughter's delicious body."

Honeyberry climbed onto the doctor's lap again, her naked body trembled slightly and squatted down, the powerful muscles of her calf clamped the doctor's waist, and the white jade-like thigh guided the honey hole to hang down slowly.

"The body has developed so attractively, do you want to seduce me to love you well?"

"Because I want to show off to my dad, as your best daughter, every part of her body is growing up healthily...Dad doesn't want to rub and watch? "

The doctor grinned badly, and at the moment he was enjoying the softness of Honeyberry's body. He stretched out his hand to pinch that charming thigh, feeling her growth in Colombia over the years.

Honey Berry obviously follows his instructions and actively participates in exercise. Soft muscles and just the right amount of fat form a straight leg line, which has both healthy beauty and girlish sex appeal. People can easily imagine the lively picture of her jumping in the wilderness . Squeezing it up or down makes the doctor love it even more. On weekdays, when the doctor was exhausted from working, he watched his daughter's big white legs dangling in front of him. More than once, he imagined the lewd scene of pressing honeyberry under his body and letting the pair of meaty legs clamp his waist.

"Dad, it seems that I like my daughter's legs very much. I also know that compared with the mature big sisters around Dad, they are still far behind, but I will not give up. Look, the breasts have also begun to develop here."

Honey Berry held the lump of flesh on her chest with both hands, the bulging curve was already quite large. The doctor smiled and rubbed her breasts with both hands, which made the girl moan. The doctor took care of the two delicate cherries and fiddled with them from different angles. Soon, Honeyberry was panting, blushing and lewd. looking at Dr.

"The body has become so strange, Dad, my daughter's body is so hot and I want to..."

Honeyberry spoke obscene words, and her strong sexual desire made her brain dizzy, and she couldn't control what to say. With both hands on the doctor's shoulders, she squatted halfway on the doctor's body, shaking her round and soft jade buttocks, trying to point her pussy at the penis.

"Woo...uh huh...hmm..."

But after trying many times, I couldn't find the right angle. The pussy kept rubbing against the head of the doctor's penis, and the fiery front swept across her clitoris, making her shudder, and the lustful little face became more and more out of control, the full honey juice from the labia began to overflow, and the sticky white silk dripped on the doctor On the cock, it looks extremely obscene.

"Come on, Dad will help you."

In the end, it was the doctor who held Honeyberry's buttocks with his hands, and then he aligned and inserted smoothly. The initial insertion process was very comfortable for both of them. Honeyberry's virgin pussy was developed with a toy, and she didn't feel much pain at first, but the size of the doctor's penis was obviously beyond her imagination. With the doctor's slow insertion, it was difficult The pleasure of words is being transmitted to the brain through the nerves in the folds of the flesh.

"Well...uh huh...Huh ah...Dad's cock, penetrated inside...Ah, it hurts, woo woo..."

The tears in the corner of his daughter's eyes made the doctor's heart tighten, and the father's love made him instinctively say: "Then let's be gentle, Honeyberry, relax a little..."

From the beginning of the insertion, the tight and hot wrapping feeling urged the doctor to seek pleasure from his daughter. Until now, he could feel a thin layer of membrane on the head of the glans, and then he held his daughter's buttocks to stop the insertion .

Honeyberry gasped for a moment, wiped away her tears, and then nodded encouragingly to the doctor.

The hymen was torn by her bloodless father and no blood came out. Honey Berry did feel a tingling pain, but soon she began to gasp for breath because of the comfort of her petite vagina being filled. She exuded a rotten and lewd sweat fragrance all over her body, and the water mist around her contained a sweetness like a love potion. The doctor knew that it was the unique body fragrance of honeyberry. Honeyberry hooked the back of the doctor's head and began to twist her body vigorously. The graceful slender waist followed the swing, and began to ecstasy bow bending, one up and one down, the slightly unfamiliar strength, all made this first experience of sexual intercourse The body, aware of indescribable stimuli.

"It feels like the body is full...Hey, every time you go deep, it's like an electric shock, hey...eh...pain and comfort...dad, eh...eh..."

After the thick penis was inserted into the petite hole, he felt the dense folds of flesh. The doctor opened his mouth sluggishly, with hot sweat on his forehead, and his body was dominated by bursts of pleasure. He was teased by the messy rhythm of honeyberry, like an irritated wolf, he longed for more intense and hasty intercourse, but looked at his daughter's white, tender and delicate body, but endured it all the time. It could last five or ten minutes, and he's not sure he won't push Honeyberry down on the couch and fuck hard.

"Dad, I want to... hurry up, I will try...It will definitely make daddy comfortable, eh...eh...daddy together..."

Honey Berry didn't know that she had satisfied the doctor's needs unintentionally. She twisted her hips violently and pressed heavily on the doctor's body again and again. The viscous and terrible honey juice is swayed wantonly.

The doctor felt that Honeyberry was on the right track, that she was a genius for a teenage girl having sex for the first time. With the ups and downs of her kinky buttocks, the pain of the broken vagina has disappeared, and more pleasure comes from her hard pumping, like a tide. A lot of sweat made her look like a water lily. With the gradually intense rhythm, the gray braids flew up and down, the petite vagina was constantly reshaped by the doctor's penis, and the elastic vagina was repeatedly squeezed and deformed. The forging process resumed instantly. She was pleasing herself almost crazily until she couldn't control her expression anymore.

"Yeah...eh...Dad, I'm going...Fucked to orgasm by cock, yee...I can't take it anymore, I'm sorry...eh...dad, i'm sorry..."

Honeyberry screamed in a soft and seductive tone, and unconsciously yelled out the lines she learned from the movie, which was in sharp contrast to her pure and lovely face. Swelling up to the top of the sky, the accumulated pleasure breaks through the threshold, resulting

in a female orgasm called squirting. She straightened up like a proud white swan, her obscene cry echoed in the room, and as the doctor shivered, a large amount of hot semen was poured into the uterus, completing the last step of perfection.

"My stomach is full of hot cum...no call...Huh...Huha...No, it's inside, it's all leaking out, I'm sorry Dad, it's such a waste of your things...sorry..."

Honeyberry's watery mouth was slightly opened, and she kept lying in the doctor's arms and panting. Naturally, the petite uterine meat pot couldn't hold so much semen, and most of it leaked out.

"It doesn't matter, Honey Berry has worked very hard, and successfully squeezed out father's semen the first time she had sex."

"I was praised by my father, hehehe...There was a 'puff' just now, and it felt like they were all shot in, so it was like this. "

She flicked her tail excitedly, reluctantly pulled out the dick from her body, some of the cloudy semen was brought out, and more remained in the girl's precious Taoyuan.

"Good girl, let me hug you, don't let your body catch a cold."

Honeyberry buried herself obediently in the doctor's arms, coquettishly in a soft tone: "Hmm...Dad's chest was so warm. Can you pet my head, just like before, my favorite. "

After being intimate for a while, the doctor patted Honey Berry's buttocks to signal her to stand up. The silky delicate skin and the erotic rebound of the plump buttocks made the doctor almost couldn't help but enjoy it a few more times.

"Tonight, I want to be with Dad, can I?"

The doctor sighed, looked at the lovely stunner in his arms, and nodded.

The two packed up the office and walked back to the dormitory. After enjoying such a comfortable thing, Honey Berry's face was flushed at the moment, she hugged the doctor's arm, her demeanor and demeanor were quite intimate. The doctor's expression was a little uncomfortable, recalling the soft touch of honeyberry's skin, but he was worried that he would hurt his daughter if he couldn't control himself on the bed.

The first thing after returning home is to take a shower. The doctor wanted to wash them separately, but was half pushed and half stripped by Honeyberry. The male physiological characteristics were fully seen by a fiery gaze, and he even felt a little shy. Honeyberry also shyly took off her clothes, and the two stood naked together, and everyone could feel each other's heavy breathing.

"I want to wash with Dad."

Short and deadly words pierced through ethics and morality like a sharp knife. The doctor sighed and walked into the bathroom with

Honeyberry.

The shower head above the head began to sprinkle comfortable hot water, and the doctor and honeyberry stood below and began to clean. But honeyberry was a little dishonest, she grabbed the doctor's hand and asked him to wash herself, and then saw the doctor wiped the milky white shower gel, stretched it to her chest, and wiped her soft and attractive breasts. Honey Berry's white and greasy body trembled slightly, and a lot of foam flowed down her stomach. She felt the touch of the doctor's fingers rubbing, almost gentle and carrying an electric current, constantly teasing her body, and then moved closer and closer. Nearby, the sweaty little head walked under the shower, and immediately hid that charming little face in the wet hair, making it difficult for the doctor to see clearly.

"This little hole also needs to be cleaned by Dad."

The doctor licked his lips, thinking that this girl is getting more and more seductive, then he wiped some shower gel and spread it on the mound of shame between her legs. The rubbing of finger flesh and foam made him involuntarily outline the outline of his daughter's labia in his mind. The petite pussy was not as wide as his two fingers together, and it felt very soft and tender to the touch, the sweetness unique to young girls. The tender pussy, trembling slightly as he rubbed it with his fingers, was at his mercy.

Soon, he felt his penis being scratched by something wet, and peeking out of the corner of his eye, he realized that Honeyberry was teasing him with the extremely fine and soft fluff on the inside of its tail. Naturally, he was hard.

"Dad, it seems like this place has become, the same as before...."

Honeyberry looked at the doctor's penis which had recovered from his crotch, and swallowed a mouthful of saliva. She turned her head and smiled mischievously yet charmingly, then turned her back to the doctor and bent down actively, pointing her tender buttocks to the doctor's crotch, holding one hand on the wall, preparing for what happened next, and the other. With one hand, he opened the pink, tender and embarrassing labia, like a blooming flesh-colored flower bud, showing the doctor the layers of delicate holes, and begging the doctor to rape himself from behind.

"I really want my dad to love me from behind. I can't do masturbation in this position....Come in, Dad. "

How could the doctor resist such a temptation, he took a deep breath, grabbed his daughter's tail with one hand, let the ostentatious rat tail swing in his hand, and suddenly thrust his cock into the small hole. The pussy kept enough elasticity and humidity, allowing him to fuck deep in one breath, Honey Berry cried out softly, her face was blushing lustfully. She whimpered a few times, and then was panted by

a series of intense thrusts. This time the doctor ravaged her crotch hard, and the friction felt by the folds was several times that of before. Her delicate and moist pussy was bullied unilaterally, round after round of heavy impacts continued to come, and the sound of dull and rapid physical collisions echoed in the bathroom one after another. She felt the pleasure of being conquered as a female beast, and that joy surpassed reason, enough to make people temporarily crazy.

"It's so intense...eh...eh...eh..."

Honeyberry leaned on the wall, her body was shaking non-stop, the water dripping on her body splashed out along with the swing of her buttocks, the more intense thrusting made her tighten her legs, and the pussy that was brutally bumped also followed Tightening, comfortable pleasure and satisfying desire to conquer stimulated the doctor even more crazy. The penis is like a giant cannon, continuously plowing the petite passage with surging power, Miberry feels that the brain can't think at all, and the body is in a beautiful and joyful melody.

Under the full stimulation of the glans, her uneven fleshy folds began to tighten, wrapping around the dick that invaded the pussy like an octopus sucker. The doctor sensed the sign that his daughter was about to climax, and he kept rushing forward like biting a prey, powerfully pumping Inserting and rubbing against the suction-rich membrane wall, he violently raped his daughter's moist and tender teenage pussy, and what responded to him was Honeyberry's obscene and erotic cry. The tsunami-like pleasure was born at the moment when the mouth of the uterus kissed the glans. The viscous love liquid became like milk milk with the excitement of the body, mixed with white semen, and overflowed from the two labia with the impact of the dick. She flicked her tail excitedly, and her body was shaken to the point of being thrust. This wonderful scene made the doctor couldn't help being bullied even more, and then a round of slaps slapped her tender and moist buttocks, and there was an obscene and lewd "papa" sound. Doctors in the past would never hit their beloved girl with their own hands, but now looking at the swaying buttocks, he felt distressed and excited at the same time, and couldn't help caressing the red handprint left by him—he Who would have thought that the daughter-like honeyberry would not only grow into a young and beautiful girl, but would also take the initiative to seduce herself into bed.

"dad...Yay, don't bully my ass...eh...eh...The pussy and tail are well loved, the body needs to be...eh...or not..."

Honeyberry was so cool that she showed a lewd expression, saying no, but her body would not refuse the pleasure. The pussy contracted

spasmodically several times, the doctor believed that this was a signal that his daughter was about to climax. He suddenly accelerated the frequency of thrusting and thrusting, mentally preparing for the release, the fine cannon filled with the scrotum was about to pour out in the final round of impact. After the quick and wonderful three-stroke combo, he suddenly straightened his upper body, and poured out the fiery essence from his scrotum. Honeyberry screamed wildly, feeling hot semen pouring into her uterus while she climaxed. Her body was crouching against the wall and her body was convulsing, her straight legs bent down feebly, and her brain was occupied by pleasure, causing her to be unable to control her expression. The two were panting violently, maintaining their peak movements, enjoying the burst of crazy joy.

"Daddy cums so much it fills up the inside of the pussy...I really like this warm feeling, oops, it's about to flow out..."

"Ugh...It's a bit of a waste. "

The doctor's physical strength recovered quickly, and he slowly pulled out his dick, watching the semen that had just been ejaculated out of his daughter's delicate hole, thinking in his heart that this lecherous daughter can really toss. Just now it was too intense, but now the deep-rooted father's love finally prevailed, the doctor felt sorry for his daughter's body, hugged the honeyberry in his arms, buried his face in her wet hair, and sucked affectionately Rubbing the base of her ear, while enjoying the lovely moans from Zarak's mouth, he guided her to lie down with him.

He dunked his fingers into his daughter's honey hole and used clear water to get the semen out. This process was quite exciting: Honeyberry separated his legs as much as possible, allowing the doctor's fingers to insert into the small hole without hindrance, like a meat hook across the sensitive flesh wall. Honeyberry's whole body was tense, her skin was flushed with a lustful pink, and she let out a long gasp as the doctor's digging, and her erotic breasts and legs trembled slightly, becoming more and more alluring. The more the doctor picks and digs, the less semen flows out of the honey crack, and the more lewd water, Miberry just feels that even her soul will be picked out by the doctor together. She experienced the feeling of being controlled by a man for the first time tonight, squinting His eyes were fixed on the penis not far from the mouth of the clam, and his body was scorched by the fiery sexual desire. She twisted her body in the doctor's arms like a snake, begging: "Dad, my daughter feels it again, right here...fuck me, fuck me to death, please..."

The doctor put a soft kiss on Honeyberry's lips, and the tone full of love couldn't tell whether he was confessing to his daughter or his lover: "Be good, wait until you get down on the bed, Dad will make

you the happiest woman in the world .”

The doctor came to the bedroom with Honeyberry in his arms. He lay down on the bed first and said, “Miberry, sit on my face and I’ll help you lick your pussy....”

The girl blushed, watching the doctor’s head quietly leaning against the head of the bed, her body lying lightly naturally, with a slight slope, as if she was ready for her to sit down.

“What a shameful pose, I want to be licked by my father or something...Dad will be uncomfortable with that posture, right? ”

“Don’t worry, Dad is enjoying it, come up quickly.”

Honey Berry moved her body carefully, and sat down with her white, tender and smooth round buttocks facing the doctor’s face, kneeling on both sides of his upper body with her legs, so that her pussy was facing his face. This posture also allows Honey Berry to face the majestic penis at close range. The strong smell of semen is very easy to pass in the hot and humid air. She licked her tongue, slightly opened her rosy mouth, and breathed heavily The air of masculinity.

“Yeah...Tongue licked up, hey...itchy dad...”

The doctor started to lick his daughter’s tender pussy with his tongue, using the tip of his tongue to stimulate the petite nut inside. His tongue swept across the opening of the urethra from time to time, but he didn’t mind. The part called the clitoris has been taken care of in all aspects. The doctor is sucking the delicate red beans from time to time while licking, as if tasting a delicious pudding. The honeyberry’s throat squeezes out intermittent moans, soft and ecstatic syllables, It was like a love potion that stimulated the doctor to be more unscrupulous.

“No, Dad, it’s dirty in there...but eeeee...eh...It’s so comfortable, it’s completely different from the feeling of a toy, I really like it...eh...uh dad...so comfortable...”

Honeyberry felt an unprecedented pleasure, touching the tip of her tongue was like electric shock, and sucking her mouth made her soul ascend to heaven. She squinted in bewilderment and began to lick the cock that belonged to her father in front of her. The small, wet and hot tongue licked all the way from the root to the purple-red glans, the sticky saliva was lightly smeared, and the dense pubic hair scratched her cheeks, but she showed an expression of enjoyment, even buried her mouth in the doctor’s pubic hair, and licked it passionately with her tongue Lick the skin under the pubic hair.

Because she was too comfortable, her tail also became uneasy, and she slapped the doctor’s cheek mischievously while he was licking the honey juice in his pussy. The fluffy tail made people feel itchy, the doctor came to be sexy, he made Mimi Berry sit up a little, and exposed the position of the asshole.

body, his huge roots stretched the folds of flesh on both sides, and slowly rubbed the head of the glans, then gradually accelerated and thrust hard into the delicate hole overflowing with lewd water. Honeyberry howled lasciviously, and because she was too comfortable, she raised her head high, her eyes stared at the ceiling in a daze, her white body was covered with sweat. The posture of the two of them having sex contained a sense of naked and harmonious beauty, and the extremely comfortable combination of sexual organs made her little head give up thinking. The frequency of pumping and thrusting was sometimes rapid and sometimes gentle, as if teasing her sensitive and slutty nerves. The pussy was teased unbearably, and viscous transparent love juice kept coming out.

"Ugh...oh...oh...oh...eh, eh...So intense, so comfortable...Daddy's cock in pussy, keeps bumping..."

Since the waist is tightly hugged by the doctor, the whole body is completely dominated by the other party, and the force of wanton pouring makes her shake non-stop, massaging the uneven membrane wall in the pussy according to the girl's heart, the doctor is like an automatic gear. Sexy reclining chair, using the most comfortable rhythm to pump and insert honeyberry's lustful pussy.

Honey Berry was obviously comfortable being served, she couldn't help rubbing her breasts, her fingers skillfully stimulated the pink nipples, like a selfless sex exercise, the big butt thrusting under her body showed a fierce posture, she followed that Round after round of sprinting, she kept savoring the bursting pleasure from her sensitive zone. The sound of dull and rapid body collision resounded through the room, shaking violently to the point of dizziness. Ewha's rainy expression was full of lewdness. She stuck out her tongue and kept playing with herself breasts, a sound echoed around, and the hearty pleasure continued with each other's movements, until the climax that was almost ecstasy came gradually.

The thrusting lasted for nearly ten minutes, and the pleasure in Honeyberry's body was on the verge of breaking out like a powder keg. She moaned, howled and begged for mercy. There was a tendency to break down, and she felt like she had never been stimulated to this level.

"Going.....dad, eh...pussy is going...together, yee, yee...go together..."

Afterwards, Honey Berry's body suddenly tensed up like an electric shock, and a large amount of sticky hot honey juice began to spray out from the small hole, and crystal clear spring water splashed out. She showed a lewd and embarrassed appearance, her white body was trembling constantly, her eyes were turned white by the violent tide, her facial features were occupied by the pleasure of orgasm, twisting

into an incontinence-like depraved expression.

At the same time that she sprayed a lot of water to wet the bed sheet, the scalding white cloud also poured into the girl's womb. The doctor's brain was in a trance for a while, and after pouring out a full shot in the small hole, he kept breathing calmly while maintaining the movement just before orgasm.

"Dad, my pussy was so comfortable just now....I still want to be loved by my father like this, my father's dick has never been soft..."

Honeyberry turned over and wetly kissed the doctor's neck with her small, soft mouth, followed by the light and delicate fragrance of the girl and the strong smell of semen. The doctor embraced her graceful waist, looked at that young and shy face, and responded to her teasing with deeper kisses.

"Well...uh uh uh...Um..."

They kissed fiercely, the entangled tongues exchanged each other's procrastination, it temporarily occupied the power of breathing, the drowsy panting and the messy tongue entanglement were a perfect match, honeyberry moaned and demanded, wonderful suffocation Sensation only kept her libido high.

Unknowingly, she was pressed on the bed by the doctor, licking her lips to experience foreplay like a beast, the doctor lowered her head and licked her skin roughly, from the collarbone to the pearly white part of the breast, the tip of her tongue She licked her moist flesh like bulldozing, writing on her protruding breasts like a cursive. The unusually stimulating pleasure made Honeyberry moan badly. She opened her legs unconsciously, exposing the pussy under her body that also longed to be caressed. It was opening and closing non-stop, and the thick semen that flowed out dripped on the sheet.

"When did it become so pornographic? The body grows like this, isn't it just to seduce me to sleep with you?"

Honeyberry licked her tongue, but did not answer, but hugged the doctor's head and kissed again. She felt the thick cock trembling on her belly, the doctor gasped heavily, and pressed her open legs onto the bed, the air smelled of rotten and obscene, her pussy was full of The fragrance of heather flowers, the originally pure and straight legs are now like a prostitute, full of crystal clear love liquid and creamy life essence.

Afterwards, the doctor inserted the majestic giant root into her pussy again, and the two looked at each other, panting hotly one after another. The strong desire burned the body like fire, and the man in the upper position began to pump the body. The doctor who took the lead in sex began to vent his desire. The rapid thrusts made the bed creak discordantly. The muffled sound of physical collision was

like the tide hitting a rock. The lewd water splashes out as the male root keeps pulling away.

Honeyberry let the other party gallop on her body, and cheered for him with soft and ecstatic moans. Her blushing and lustful face was covered with a layer of fragrant sweat, and her whole body was like a lotus emerging from water. Sex brings her unprecedented pleasure.

"Yeah...babble...Dad, ah...so intense...don't stop, don't...uh..."

Sentences of lewd words teased the doctor's gradually trembling nerves. The original pure and lovely appearance no longer existed. Honeyberry's suppressed sexual desire for a long time broke out completely, showing a lewd appearance that the doctor had never seen before.

I always feel that I have taught a lot of things badly, the doctor was thinking hard while pushing hard. The daughter's upright soft breasts swayed under my constant sprinting, showing amazing elasticity like jelly. Perhaps this is the unique charm of a girl's body. Everything has just matured and has not been caressed for too long. Honey Berry also spread her arms, her seductive upper body became more prominent, and her charming and lustful eyes seemed to be observing the doctor's desire.

He licked his lips, stretched out his hand through Honeyberry Hanxiang's armpits, helped her to her white, tender and clean back, and lifted her body up slightly. When she woke up, she realized that the doctor had already pressed her face against her tender breasts.

"Dad, you're so cunning...At this moment, um...don't bully there...The boobs can't take it anymore, eh..."

The pink and sensitive nipples were wrapped by the man's tongue, the doctor growled like a beast, licked his daughter's tempting nipples, and danced violently, the blush kept jumping on the tip of his tongue, sticking Thick saliva was smeared all over, and then sucked unscrupulously. The obscene "hissing" sound came from the doctor's mouth, and Honey Berry felt her nipples itch from being sucked, and the dense and sensitive nerves sent out a rapid current, which made her feel overwhelming pleasure.

"Oh oh oh...oh oh oh...oh oh oh..."

Honeyberry stuck out her seductive tongue and screamed fiercely. The double stimulation of her pussy and nipple made her confused eyes even more obscene. Now she has become a female animal toilet played by the doctor wantonly. An unfamiliar rough rhythm dominates her body. The intense sucking makes her nipples swell, and she even has a feeling of itching to produce milk. Of course, her current body has not yet truly secreted breast milk, but she just experienced the scene of breastfeeding as a mother early. Let her excitedly start fantasizing, calling the doctor's father while having sex with him,

and a lot of immoral images emerged to add a fire to this lewd copulation.

"Dad don't...Don't lick it, it's so embarrassing, hey...eh...Dad, I'm going to lose face..."

She slapped the doctor's back with her tail eagerly but refused, but her body was still under the crazy piling of the thick stamen twice a second. The doctor's thrusting action almost brought out afterimages, and he worked hard to fuck the girl's sensual and slutty flowing honey hole. The petite vagina catered to the adultery and sucked non-stop, and the penis inserted into the body enjoyed unparalleled stimulation every round.

Honeyberry screamed one after another, and the brain that was dizzy from being fucked by the doctor started a lewd fantasy: in the place of the daughter but doing things to help the father deal with his sexual desire, every night from now on will start a lewd performance of identity switching, during the day Play as a good daughter to enjoy his pampering, and enjoy his love as a lover at night. For her, it is the happiness she dreams of.

"Strength...Daddy, fuck me hard, don't be sorry, I want to be your good daughter and cum on your bed every night...uh...uh ah ah..."

She originally thought that the identities of her daughter and a woman were just a letter difference, maybe it was just a difference in treatment, but it was only at this moment that she understood the crazy demand and possession, dividing the gap between family and love. It is precisely because of the crazy attachment that the passionate feelings turn into desires, and sex and love accompany twins, which is the reason for her to open her legs and ask the doctor to her heart's content.

"Fuck people's cunts and plant seeds in them...Yay, cum as much as you like...Yay, ah, fuck me..."

"Uh oh...It's so intense, my brain can't think of anything, hey...I just want to be fucked by my daddy's dick until I cum...Dad, I really want..."

Honeyberry's lewd shouts are high-pitched and seductive, combined with hoarse moaning, it makes people's bones go limp. The doctor gritted his teeth and was sweating profusely, but still accelerated the frequency of thrusting, apparently by Honeyberry's The waves are too exciting.

Honey Berry called her father's title over and over again, constantly arousing the doctor's sense of guilt, and the sincere fatherly love in his mind was inconceivably twisted together with the animalistic and crazy love. Not being frank, he could only pump his cock blindly, let the hearty pleasure paralyze him, and use more rough movements to love his daughter who has no blood relationship.

The increasingly rough and heroic rhythm expanded Honeyberry's pussy to an astonishing size. The doctor galloped on her like a wild horse, and her body was crumbling under rounds of fierce charges. Honey Berry instinctively wrapped her two seductive legs around the doctor's waist, allowing this male beast who was teased by her words to unleash the surging power of life. The delicate lower body was pushed up and down. The thick crowned meat mushroom at the front of the penis continued to hit the Yumen of the uterus. The half-full semen jug kept shaking. She felt the pleasure of ascending to heaven in her body. Both hands Hold the doctor's head tightly.

"What a lewd and coquettish daughter, she has only done it a few times...That's it, such desires and dissatisfaction, huh...love daddy's cock that much..."

The doctor put his hands on both sides, and pressed the honeyberry firmly on the bed with his body. The skin mixed with sweat was tightly attached, so that the honeyberry under his body could only breathe the air mixed with the strong sweat smell of the doctor's body.

"He's been captured by daddy's cock and turned into a bad boy who can't think without his cock...Please daddy punish this honeyberry and make it yours, eh...Become, only your sowing meat toilet..."

The doctor sped up the frequency again, the bed shook even more violently, and the heavy breathing turned into a low roar like a beast.

"The little pussy is going to be fucked, the big dick is going to fuck it...ah oh oh ah ah...no dad...fuck me hard, fuck me hard..."

Honeyberry's whole body was tense, her two hands clutched the sheet and she dared not let go, her body swayed along with the bed, and the dull physical collision sounded like thunder, which refreshed her to the point where her lax mind gathered up a little.

"Yeah...Dad, I'm going...sorry, eeeeeeeeeeeeeeeeeeee...Pussy is going, fucked to orgasm by daddy's big dick...ah ah ah ah ah..."

The two sighs overlapped together, like the last fig leaf to cover the night of obscenity. The doctor's bull-like body suddenly pushed forward, inserting the thick genitals under the body into the hole full of lewd water splashing, Honeyberry's soft and white body suddenly stiffened, and then convulsed continuously due to the intense squirting, she intermittently Moaning as if begging for mercy, the exquisite orange eyes rolled up white, and the cherry lips that couldn't be closed kept drooling.

The doctor simply lay on Honeyberry's body, feeling the ejaculation that almost emptied his body, and the thick genitals like a beast released semen that was equal to desire. At the beginning, he thought that he could resist fucking his daughter violently, but now the

facts are as he sees, wishful thinking.

"I learned these lines from there, and I'm not allowed to say it in the future. I'm afraid I won't be able to bear such a lecherous daughter."

"Well...Daddy, the inside of the pussy is already in the shape of Daddy..."

Honeyberry was still in a trance, talking unconsciously. Her petite pussy naturally cannot hold a large amount of semen, spring water mixed with the doctor's life essence flows out from the pink "one-line sky". The doctor slowly pulled out his penis, looked at Miberry's red and swollen labia, couldn't help feeling distressed, and gently caressed his daughter's belly.

"Dad, let me clean up, cum on your cock...This is the duty of a daughter. "

Honeyberry gently grasped the doctor's hand, and seemed to be slightly relieved. The wet gray braids were draped over her shoulders, she stared at the man with her delicate eyes, her soft and moist jade lips parted slightly, revealing a cute and pure expression, she was completely different from the little slut who just asked for love.

"Then you have too many responsibilities, let Dad teach you one by one."

"Everything is up to you, until Dad lies down."

Honeyberry's wet animal ears trembled cutely, and she slowly got up from the bed, crawling under the doctor's crotch like a cute camel beast, she licked her tongue, her blushing face pressed against the man's thigh, Enjoy the smell of rich essence mixed with the exotic fragrance of love liquid. The bridge of her delicate nose is buried in the doctor's messy pubic hair, and the fair and beautiful girl's face is attached to the man's dark male jungle, creating an unspeakable visual impact like blasphemy.

She held the doctor's penis with her hands, and her small mouth held its thick front end in a strange way. The doctor lying on the bed trembled and felt like being shocked by the tongue teasing. The flattering tongue is entwined with the coronal meat mushroom and keeps going downstream, taking advantage of the trend to roll the semen remaining on it into the mouth, and the soft and waxy lips will soon be covered 1/3The length of the mouth is also the last part that the girl can swallow. With the scratching of the teeth, it is hard for the doctor to say how comfortable it is, only a different kind of sensory stimulation.

Honeyberry spat out her cock, her curious eyes tried to see the doctor's reaction. The doctor didn't say anything, but just reached out and rubbed her head. As if she was encouraged, she used her

tongue to lick the surface of the sperm-stained cock, but gradually realized that this was very inefficient, and the doctor didn't like I make comfortable sounds like in adult videos, I'm afraid I don't feel comfortable doing so.

"Honeyberry, it's actually very simple to make a man comfortable, you continue to stimulate the crown, gently, like a kitten licking water..."

The doctor scratched his head and began to patiently instruct Honeyberry how to perform oral sex. She pricked up her ears and listened, while sticking out her tongue to lick the front of the cock, scraping away the remaining semen in the crown groove with the flexible tip of her tongue, and then rhythmically added sucking movements during the licking, and the hissing sound came gradually. . It seems like she's as talented at blowjobs as she is at her mastery of herbs. The lewd sound of water intertwined into a beautiful melody came from the doctor's crotch, and the man raised his head in excitement, and praised Honeyberry's efforts with his movements.

"Well...Dad's cock is much bigger than it looks in the movies...But it's delicious, why, it obviously has such a strong smell of essence..."

Honey Berry tilted her head and licked the root of the cock, her delicate and lovely face looked intoxicated, and her wet and hot tongue kissed the oocyst with the strongest male body odor. She licked very earnestly, pulling out crystal water between her tongue and the dark egg sac, listening to the doctor's guidance, she sucked the wrinkled skin on the egg sac with her lips, and at the same time made an ok gesture with one hand , repeatedly fiddled with the front glans.

The stimulated horse's eyes began to secrete prostatic fluid, and Honey Berry was like a girl who was rewarded, with an uncontrollable smile on the corner of her mouth. She obediently brushed the braids at the side of her temples, her little gray head was pressed against the doctor's crotch, and she began to lick the most sensitive eye at the front of the male genitalia with her tongue.

"Dad seems to be very happy, is it because he is so comfortable with his tongue?"

"Well, as expected of the good daughter I brought up, she is very talented..."

The doctor held back his messy breathing and squeezed out a gentle smile, and the encouraged Honeyberry immediately began to show the learning results. Through continuous sucking and licking, she has learned how to make the doctor look like she wants to die, and the next situation is getting better, she sucks the front of the cock in her mouth, and the oral sex skills that are gradually proficient are

completely different from the beginning people. The doctor felt his body was numb and weak, and his spinal cord seemed to be sucked dry. Honeyberry swallowed his penis hard, letting the glans gallop freely in the hot and humid hole, accompanied by bursts of intense suction, it will soon be To the end of that ejaculation.

"Can't help...Ugh, I can't help but want to cum...catch it well, this is the last class...eat them all...uh ah ah..."

Honey Berry flicked her tail excitedly. As the rhythm gradually accelerated, her soft and waxy mouth could finally hold more space. The beautiful swallowing sound played out a seductive note, accompanied by the girl's slightly painful voice. With a groan, the doctor opened his eyes wide. An indescribable pleasure came from below, and a hearty feeling of separation began to spread in the scrotum, passing through the urethra until it gushed out of the horse's eyes. in the mouth. He felt that his daughter was sucking the penis hard, and the mouth cavities were continuously tightened by a burst of swallowing, mixed in the beautiful melody of the orgasm, just like the black and white keys on the piano, as the strings gradually rose, the major tune called sex was played.

Honeyberry holds her hands under her mouth, catches the semen that keeps overflowing from the corners of her mouth, and at the same time swallows the hot semen in her throat, swallowing round after round to send the precious essence into her stomach in batches, and finally sucked by her small mouth With the glans slowly pulled away, after finishing all this, she exhaled greedily and looked at the doctor with a ruddy face.

"The rest of the semen should be cleaned up properly."

She picked up the remaining white liquid in her hands and drank it all in front of the doctor. After watching the process, the doctor stepped forward and hugged her, pampering her wet back.

The sheets were already soaked with bodily fluids, and the exhausted two had to hug each other and lie on the sofa. The doctor gently stroked the girl's cheek, as if he was comforting his lovely daughter, but also as if he felt sorry for his alluring wife. The two emotions were mixed and fused together.

"Daddy, good night..."

"OK, good night."

After establishing a relationship, the two people will often be affectionately together in the absence of others. Usually, Honeyberry asks for a kiss, and sometimes it is the doctor who asks to enjoy the perfect touch of Zalak's toned thighs and silky long tail.

On Valentine's Day, the doctor who was busy with work seemed to have forgotten the holiday. When he was working hard, he only heard the

sound of a door being pushed gently in front of him.

"who?"

I saw only a pair of beautiful legs wearing white knee socks, and walked into the office with frivolous and seductive catwalks. The doctor's eyes straightened, looking at the rosy legs wrapped in silk stockings, he could clearly see the fibers. The texture is stretched, and the pure white stockings are thin and clinging to the entire jade legs, showing the beauty of the leg lines and the charm of the stockings.

The lace of the white stockings wraps around the base of the thighs, further shrinking the round and plump outline, and the fleshy feeling is highlighted, and it is more eye-catching with the swing of the legs. The ultra-short white skirt was lifted up, and the doctor found that the owner of these legs was still wearing sexy lace underwear. Watching her walk was a visual pleasure.

"Dad, do you remember what day it is today?"

A soft and longing girl's voice came from in front of him, and the doctor realized that the girl in white stockings in front of her was Miberry. Mature and beautiful.

Originally, her facial features were still a little immature, but now they are a little more feminine, obviously because she has prepared a lot for today.

"I'm sorry Honeyberry, I'm too busy with work..."

"Is that so, but Dad, I'm so lonely now, I really want to stay with Dad."

The doctor swallowed, and watched Honeyberry blushing, standing in front of the table with both hands on it, slowly moving towards his hands, the whole body also leaned forward, the thin collar on the chest was deliberately pulled open, using the gravity to hang down to reveal the lace underwear she was wearing inside, the doctor's eyes were so protruding, thinking that this girl dressed so coquettishly today, her body reacted immediately.

"Don't call me that at work, call me Doctor."

"Dad, the door of the room was locked by me, take a break and spend time with my daughter...Today I specially dressed as my dad likes, your favorite lace underwear and white stockings..."

Honeyberry squinted and deliberately tore off the collar, put one leg on the edge of the table, and showed him what she emphasized. She didn't care about her body being stared at, but she wanted the doctor to keep staring at her.

"call...It's okay to take a break then. "

The doctor gently touched her warm hand, and her breathing became rapid. As if she had succeeded, Honeyberry climbed up to the table and swept the documents in front of the doctor to the sides. Her soft

butt took their place, wrapped in white The milk legs in stockings pressed their sexy and alluring body in front of the doctor in a duck sitting position.

Honey Berry coquettishly enjoys the doctor's touch, from the thighs wrapped in meaty stockings to the outlined pussy, the doctor is playing with her white and soft body to his heart's content, the skirt is lifted, and fingers are constantly twitching her body There was a small slit, and the top was lifted up, and he buried his face in the swollen breasts, breathing in the refreshing frankincense of the milk trough to his heart's content. The soft mountain bump scratched her cheek, causing the girl to groan. The doctor hugged her waist and kept squeezing into her arms. The wet, slippery and warm skin was like suet jade, and her fingers kept sinking into it.

Soon, a puddle of bad love juice was left on his table. Honeyberry took off her shoes, and her body was already dripping with sweat. After the sweat was absorbed by the stockings on the soles of her feet, a strong smell that had been smoked for a long time wafted out. Her milky white fleshy feet Ya lightly stepped on the doctor's bulge, and her seductive milk legs kept shaking in front of her eyes, which made the doctor's sexual desire even higher.

Honeyberry knowingly asked: "Dad, it's getting so hard here, is it because you're excited about being trampled by legs in stockings?"

She licked her lips, stepped down from the table, and slid into the doctor's crotch, releasing the stiffness of the blood-congested erection. The small mouth skillfully held the front end, and kept licking the horse's eyes with the hot and humid tongue. Because the teasing just now was too stimulating, the doctor's body exuded a strong body odor. She liked this smell very much, and the tail flicked excitedly. She began to serve the penis with her flattering tongue.

"Hum...um...Daddy loves blowjobs, the dick gets so hard, loves it...um...Hmm, your daughter's small mouth will make you feel better."
"

The wet and soft tongue began to roll the crown mushroom, cleaning up the prostatic fluid overflowing from the meat groove, she squinted her eyes dimly, let out a bad and tempting gasp with an intoxicated expression, the fluffy animal ears stood up due to excitement, With a trembling look, the doctor couldn't help stroking his daughter's lovely head while enjoying the service.

Encouraged by the honeyberry, she also began to touch the honey hole with her hands, squeezed her clitoris through her panties with her fingers, and squeezed out bursts of tingling pleasure with friction. She sucked the front of the glans and greedily swallowed the juice overflowing from the eyes , the body becomes hot with the rising

sexual desire.

Then the lowermost scrotum was lifted up by the seductive tongue, and the hot and humid lips were pressed against it excitedly. The weak and frequent suction made the doctor feel that the egg bag was about to be sucked dry, and the whole waist was numb with coolness. Hear her gasp as she masturbates.

The penis that has been served to the fullest begins to tremble, and the horse eye that is being played with by the lewd tongue inevitably produces sperm. Honeyberry holds the front end of the crown with her lips, swallowing and pumping vigorously, the soft lips guide the penis into the deep throat, and the moment the glans passes over the narrow throat brings the doctor a numbing and addictive pleasure.

As the daughter's small mouth kept sucking the cock, a lot of numbing pleasure flooded into the doctor's brain, urging the doctor to rape the girl under him. The tight and hot wrapping feeling is breaking down his control over the fine door, and he is venting. Temptation whispered in his mind.

He endured the desire to ejaculate for a long time, and finally broke through the threshold under the constant service of his daughter's small mouth, and shot the semen wantonly into his daughter's lustful mouth hole. Halfway through the ejaculation, he grabbed the cock and pulled it out from his small mouth, and shot it on his daughter's pretty face in a wicked way.

Honeyberry didn't resist, she raised her hand to catch the doctor's essence, and excitedly enjoyed the doctor's ejaculation of the skin care semen, the hot and white turbid semen was all over her face and hands. The finished cock was still erect, casting a shadow over the girl's cum-stained face.

"Daddy's cock cums a lot, um...It stinks and I like it, um...Let people clean up the milk first..."

She licked the semen around her mouth, showing a lustful and satisfied expression, the white semen in her hands was steaming, the air under the table was not circulated, and after this bad fuck, the whole room was filled with strong smell Heather scent.

Honeyberry licked her lips, and there was a piece of doctor's pubic hair at the corner of her mouth, and she actively wooed the doctor: "Huh!...Pussy is so itchy and hot, I want to be loved by my daddy's big dick, huh..."

The doctor who had just ejaculated grabbed her daughter's shoulders, pressed her back against him on the table, and tore off her skirt and panties with rough movements, exposing her smooth and moist pussy and round buttocks In front of her eyes, the delicate ketone body was trembling because of this beast-like atrocity. She couldn't help but clamp her legs tightly, her labia was squeezed, but more lewd water

spilled out, slipping down her thighs and wet the fleshy white stockings on her legs.

"What a lewd and nasty good girl, dressed so coquettishly, is she trying to seduce daddy to fuck you with his dick?"

The doctor slapped the jelly-like buttocks, and the elastic fat was slapped non-stop, which aroused his strong desire to conquer even more. Hitting her daughter's buttocks again and again made the girl's lustful pussy flow out more love juice unscrupulously, and made Honey Berry eager for the upcoming frenzied sex.

"Yes, papa, good papa...you are about to have your little lover."

"Little baby, Dad has a better gift for you. Now let me spread my legs and let me love you well."

Honey Berry gently separated Baisi's thighs a little, and the girl's Taoyuan was completely exposed in front of the doctor. He easily parted the thick pink and moist lips, revealing the lustful stamens like delicate flowers inside, and the petite lewd hole As if breathing, viscous love liquid is gushing out. The doctor held his breath, and slowly inserted his thick penis into his daughter's cunt.

"Well...Daddy's dick is so big it fills up his pussy in no time...so happy, huh..."

"How did I raise such a lecherous daughter? Not only is her body so erotic, but her personality is also dissatisfied with desires."

The doctor slapped Honeyberry's kinky ass hard, causing her to let out a ecstasy and slutty gasp, and then moved forcefully, raping her daughter's pussy. The tight and hot wrap tightly wraps around the penis like a suction cup. The thick crowned meat mushrooms are constantly molesting the folds of the flesh to rub against the pleasure, and the elastic and delicate holes are constantly deforming with the rounds of thrusting and inserting.

"Yes, I'm Daddy's slutty daughter, eh...Want to be fucked harder, eh, want to...love it, love daddy's big dick..."

Honeyberry propped her upper body on the table and was pushed forward violently. Her little gray head was bouncing up and down with the rounds of collisions. The sound of collision with the heavy body forms a obscene melody. The girl stuck out her charming tongue and her eyes were blurred. The table kept shaking with the movements of the two of them, and the panting and screaming spread throughout the room. If it wasn't through the door, the whole of Rhodes Island would probably know the next day. How crazy, how promiscuous.

"Seduce me in sexy lingerie, huh...I really learned badly, it seems that today I will teach you well, hoo...Huh..."

"Yeah, eh...Daddy is so intense, pussy can't stand it...Is this a punishment for a bad daughter?..."

Her rapid groaning gradually turned into begging for mercy, her body

was pressed against the table, and her lungs that could not be expanded caused a slight suffocation feeling, so she had to open her mouth to inhale air continuously. At the same time, the pussy was roughly thrust, and the petite vagina became a mold tool for the dick again. Every inch of the fleshy folds was constantly glued together with the intense rhythm. Standing on tiptoe, the whole person is like a grill propped up by the doctor's penis, rubbing against the table covered with sweat and semen with rhythmic shaking.

While slapping his daughter's kinky buttocks, the doctor stretched his back and enjoyed the pleasure of being ravaged. Honey Berry pouted her ass in response, laying down on the table and exhaling lustful steam, several rounds of rapid thrusting and thrusting made her pussy begin to tighten unbearably. An irresistible pleasure is blooming with the rhythm of sexual intercourse between the glans and pussy.

"oh oh oh...uh oh oh...Pussy is about to be fucked to orgasm, fill up my daughter's horny womb, eh...want to conceive, daddy's child..."

The doctor firmly grasped the soft flesh of the daughter's waist with both hands, and bumped against the daughter's petite pussy like a bull, thrusting and thrusting like a gust of wind and rain, causing the fierce sound of water to spread throughout the room. The doctor roared like a beast, then he pressed his body down hard and hit Honeyberry's uterus with the fastest frequency, so as to activate the ejaculation signal.

Thick and hot semen poured into the girl's petite womb, and Miberry also ushered in an orgasm at this moment. The lewd water repeatedly washed the flesh wall and penis. In the convulsions of the ground, he slowly got down on the ground.

The doctor moaned and pulled out the dick. The ejaculation lasted for more than a minute. Honeyberry's cavity elastically wraps the dick, stimulating the sensitive glans, making the doctor feel numb all over.

Honeyberry panted and turned over, slowly spread her legs and sat on the desk, the semen overflowing from her pussy dripped onto the table, and then flowed down the edge of the table. The doctor stepped forward and hugged her slightly apologetically. After enjoying the orgasm and hugged by the doctor, the girl smiled sweetly and happily.

"Well, Dad, I suddenly remembered that there is another gift for you today....Oops, it's softened..."

Honey Berry took out her small bag, and took out a box of delicately packaged chocolates. When she opened it, she found that half of it had softened.

"Maybe it was because it was too intense just now....But how could I not accept it as a gift? "

"But the chocolate has...No, I can't let Dad accept this kind of gift, I'll buy it now..."

"Then why not give me the honeyberry itself as a chocolate gift?"

With a smirk, the doctor stripped off the girl's clothes, revealing her delicate and white naked body. The sweaty body was stimulated by the air, and the hot skin immediately became sensitive. She blushed as she watched the doctor throw the underwear at her feet, and took the piece of melted chocolate and spread it on her breasts. superior. The warm dark chocolate syrup flows into the cleavage, exuding a rich fragrance. The soft crispy breasts are covered with a layer of black sugar crisps, and their shape still retains the round and full shape of the breasts, which greatly increases the appetite.

"I really want people to taste it, dear girl, don't move, let me try the taste."

The doctor gently pressed Honey Berry's body on the table, and as the posture fell, the girl's beautiful white silk legs diverged to both sides. He lowered his body forward and put his face on her mountain of fragrant chocolate milk, licking the rich and delicious chocolate syrup with his tongue. The soft nipples are constantly swept by the tongue, repeatedly cleaning the remaining serum along the cleavage, and at the same time, the thick penis is inserted into the small hole again, adding a bit of fun to this pleasant eating.

"Daddy's licking so hard, pussy can't take it anymore...Hey, can't think at all..."

"You are my best gift, don't be lazy, let me enjoy it obediently."

He couldn't do two things at once, so the doctor seemed more gentle and civilized this time. He slowly pumped his waist, and slowly rubbed the fleshy folds on both sides of the vagina. At the same time, he leaned over to taste the chocolate on his daughter's crisp breast. He held it in his mouth and kissed his daughter wetly. The chocolate began to melt as their tongues entangled, adding a layer of food flavor to the originally comfortable exchange of body fluids.

Honeyberry enjoyed it, she groaned in conjunction with the doctor's movements, and slowly pushed forward to the climax together, her soft body seemed to be immersed in cotton, and was gently supported by the doctor, the combination of the two brought a wonderful experience, which is letting Time has become extremely slow.

Her legs kept swaying with the rhythm of thrusting and thrusting, and because of the movement of spreading her legs, the outline of the pubic bone between her legs was clearly exposed. She stuck out her seductive tongue and let out a more seductive cry, and her body soaked in lewd water, semen or sweat was filled with a crystal and moving luster.

"It's so comfortable, it's nice to be inserted so gently by Dad...I

want to orgasm with daddy, together with, uh..."

Honeyberry blushed and opened her arms, holding the doctor's cheeks, and the two began to kiss her fiercely. The doctor hugged her waist and began to speed up the thrusting. In a burst of wonderful joyful rhythm, he put all the rich meat in the scrotum. The semen was shot into the daughter's womb.

After the sex, the two moved to the sofa and snuggled together sweetly.

"Dad, did you just say that there is still a gift for me?" Leaning on the doctor's shoulder, Honeyberry asked curiously.

"indeed so."

The doctor walked back to the desk, unlocked the bottom drawer with a key, and took out a small square box.

Seeing the size of the thing in the doctor's hand, Honey Berry immediately straightened up on the sofa, and she could hear the sound of her heart beating, which was more violent than when she was exhausted after an orgasm: "Dad...doctor... Could it be that....."

The doctor knelt down on one knee in front of the embarrassed girl, gently opened the small box, and two exquisitely crafted gold rings shone brightly inside the box.

"Sargon's pure gold, paired with magical runes of self-defense woven by Master Letania. I hope you will accept this gift, my... wife."

"Doctor, I...I..."

Honeyberry stretched out her left hand tremblingly, and asked the doctor to put on the ring for her. She noticed that the hollow pattern on the ring formed a word she was all too familiar with: Zoe.

"I never thought that I could get this." Honey Berry stared at the gold on her ring finger, the sudden happiness made her want to pinch herself, whether she was in a dream, "Doctor, just like I said that day, you You have already given me too much, and it is my happiness to be favored by you overnight as a lover, how dare I ask for it...I would never have dreamed of..."

"My baby," he sat back on the sofa, rubbed Zarak's little head familiarly, then hugged the honeyberry to himself forcefully, looked at the girl's flushed face and said, "I said, I want to take the responsibility to make you happy. If I enter the palace of marriage with other women, what will my little Zoe do? Who will feed my little lover?"

He saw the tears in Honeyberry's eyes, and heard his favorite say intermittently: "I am willing, I am willing to be the doctor's wife, wife, and I also want father...husband to be the happiest woman in the world." man."

Hearing such a title from Honeyberry's mouth made the doctor feel a little awkward, and he also heard the other party's discomfort from

Honeyberry's words.

"I'm actually not used to it, what do you think?" The doctor hugged the honeyberry tightly. So far, he still can't tell himself what kind of attitude should be used to treat Miberry, whether he is a father or a husband? What's more frightening is that after having a physical relationship, he subtly gets used to Miberry's intimate or promiscuous "father". this identity.

"Hey, me too... Dad."

"My good girl..." He condensed his distorted feelings into a few words, and perfectly concealed his slight uneasiness: "You are mine, and you are also my pride. I love you the most."
