

Lesson 10: Six Magic Notes for Soloing

Prepared by Rowan Morris

OVERVIEW & PURPOSE

These notes were written to go along with the lessons of the SGS created by Syn and Papa Gates. I am aware that some people learn better from writing, and decided to share my notes for the purpose of comparison, correction, and also education. Please note: This does not mean I have done all the work for you. You still need to view the lessons. I may or may not have left out some information due to how I learn and everyone's needs are diverse.

Lesson

Notes

- Pentatonic Pattern:
 - find Tone Center of the song (it's usually the first chord, but not always)
 - go down a string and play pattern 5 & 7 (though this depends on the key)
 - fourth note should be octave of Tone Center
- Have fun and go ham!
