Report ID: 2

Summary: A user with a non-existent email can leave a review about a product on a product page without purchasing the product itself.

Preconditions: Be registered on the site.

STR: 1. Click on any product.

2. Click the "leave a review" button.

3. Fill in the fields with data (not necessarily valid).

4. Enter a non-existent email.

5. Click on the "agree" button.

Actual result: A user with a non-existent email (and incorrect personal data) can leave a review about a product on a product page without purchasing the product itself.

Expected result: A user does not have the opportunity to leave a review about the product without buying it.

Severity: Minor

Priority: High

The screenshot shows a chat support interface. At the top, a dark blue header contains the word "Chat" and a minus sign. Below the header, a message from the support team reads: "Sorry, we aren't online at the moment. Leave us a message and we'll get back to you as soon as possible through email." The form contains four input fields: "Имя" (Name) with the value "%#^&24&^ ^", "Почта" (Email) with the value "%^####11@gmail.com", and "Сообщение" (Message) with the value "\$%\$@". There are also social media login buttons for Facebook and Google. At the bottom, there is a dark blue button labeled "Отправить сообщение" (Send message).

Report ID: 8

Summary: On the main page, when you change the page scale and then return to normal parameters, the upper menu buttons cease to be interactive.

Preconditions: -

STR: 1. Be on the main page.

2. Zoom in on the page before the buttons in the header disappear.

3. Return the scale to its previous (normal) state.

4. Interact with the buttons that appear.

Actual result: On the main page, when you change the page scale and then return to normal parameters, the upper menu buttons cease to be interactive.

Expected result: The buttons at the top of the screen should not lose their functionality after page scaling manipulations.

Severity: Minor.

Priority: Normal.

Report ID: 9

Summary: When zooming in on the main page, the additional tabs overlap each other.

Preconditions: Be on the main page of the site.

STR: 1. Click on the "support" button in the lower right corner of the screen to open the support window.

2. Click on the "Maven Rewards" button immediately below the support button.

3. Zoom in with the windows expanded.

Actual result: When you zoom in on the main page, the additional tabs overlap for a second. This applies to the "support" window and "Maven Rewards" window.

Expected result: Windows should not overlap with each other when manipulating the scale of the site.

Severity: Minor.

Priority: Low.
