A9	Run a SAMM assessment with the new toolbox	Daniel, Tony, Bart, Seba (?)		In progress
A10	Organise extra 31st meeting	Bart		done
A11	Distribute AsciiDoc showcase examples to the list	Daniel		done

V1.2

Looks like Brian can edit the PDFs using the Adobe DC app. There is a free 7 day trial and then a \$15 monthly subscription after that.

- How To Guide

- I found the fonts (source indesign, opensamm zipfile) needed and should be able to edit content without issue

- Working on verbiage changes for 1.1 scoring -> 1.2 scoring

- Quick Start Guide

- Skimmed through it, didn't see anything that needed to change other than a couple of v1.1 mentions

- Core Document

- I can't find the GillSans MT & GillSans Light fonts that would be needed to make edits; maybe Hugo still has them somewhere? (requested per email)

Editing will be done on the 1-page formats.

Possibly we will have a version for review by the end of the moment.

V2.0

- Need for to dos before the calls for people to prepare
- Schedule the SAMMv2 calls every 4th Wed of the month same time

- Next call is to discuss S&M, Seba to prepare
- Define the “viewpoints or lenses” & criteria to look at the different security practices

What is the status of the benchmark track?

New action points:

Id	Action	Owner	Timing	Status
A1	Prepare next SAMMv2 meeting (in 2 weeks)	Seba	Next week	
A2	Check what the status is of the benchmark track with Bruce ...	Seba		
A3	Contact Yan to participate in one of the next call or have a dedicated call.	Seba		
A5	Schedule next monthly call 1 week earlier to release v1.2 at appsecusa	Seba		
A6	Start review spreadsheet for v1.2	Seba
