

PRX- T33 Bio Stimulating Treatment

This innovative treatment combines the power of a peel with deep skin rejuvenation—without peeling or downtime. PRX-T33 stimulates the deeper layers of the skin to improve texture, firmness, and radiance. The 30-40 minute treatment includes a gentle cleanse, pH-balancing solution, and serum application, followed by a hydrating moisturizer. Ideal for all skin types, this non-invasive procedure leaves your skin visibly smoother and more youthful.

Best completed in packages of 4, but you can do a glow and go 1x treatment.

Single Session (Glow n Go): \$350

Package of 4 treatments + Take home post care kit: \$1200

Initial \$279– 1st session

Book package that day \$821 (saves \$100)

For Creatives (images of like a serum applied to the face)

What is PRX-T33?

PRX-T33 is a non-invasive biorevitalization treatment designed to rejuvenate and renew the skin without the need for needles or downtime. It's a revolutionary facial treatment that combines a unique combination of TCA (trichloroacetic acid) and hydrogen peroxide to stimulate collagen production deep in the skin while leaving the outer layer intact.

Key Benefits to Highlight:

- **Immediate Rejuvenation:** PRX-T33 works to lift, tighten, and hydrate the skin immediately after the treatment, giving clients glowing, refreshed skin with no peeling or downtime.
- **Non-Invasive:** This treatment offers all the benefits of a deep chemical peel but without the peeling, redness, or discomfort that traditional peels can cause.
- **Stimulates Collagen Production:** The unique combination of TCA and hydrogen peroxide penetrates the skin to stimulate collagen and elastin production, promoting long-term skin renewal.
- **Suitable for All Skin Types:** PRX-T33 is safe and effective on all skin types and can be used year-round without concerns about sun exposure.
- **Multi-Area Use:** It's versatile and can be used to treat not just the face but also areas like the neck, décolletage, and hands.

What to Expect During the Procedure:

1. **Cleanse:** The skin is first gently cleansed to prepare for the application.
2. **Balancing Solution:** A solution is applied to balance the skin's pH, prepping it for optimal absorption of the PRX-T33 serum.
3. **Application of PRX-T33:** The PRX-T33 solution is massaged into the skin in layers, stimulating the deeper layers while leaving the surface untouched.
4. **Moisturizer:** The treatment is finished with a soothing moisturizer to lock in hydration and provide comfort.

Post-Care:

Clients who purchase a PRX-T33 package will receive a take-home post-care kit to further support skin healing and hydration. This helps maximize the results of the treatment.

Ideal Candidates:

PRX-T33 is ideal for clients looking to:

- Tighten sagging skin
- Improve skin texture and hydration
- Minimize fine lines and wrinkles
- Reduce the appearance of acne scars, hyperpigmentation, or melasma
- Achieve rejuvenated, glowing skin with no downtime

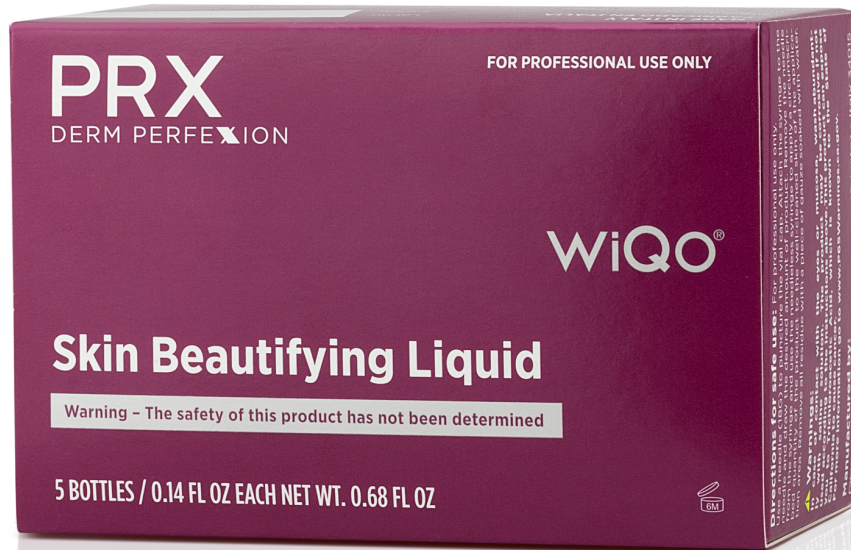

Results:

Results are visible immediately after the first session, with the skin appearing smoother, tighter, and more radiant. For optimal long-term results, 4-6 sessions spaced 1-2 weeks apart are recommended.

Why Choose PRX-T33?

- **No Downtime:** Clients can resume their normal activities immediately after the treatment.
- **No Peeling:** Unlike traditional chemical peels, PRX-T33 does not cause the skin to peel, making it a more comfortable option.
- **Immediate and Long-Term Results:** Clients will enjoy an instant glow, as well as long-term benefits from the collagen-stimulating effects of the treatment.

This treatment can also be combined with other aesthetic services, such as microneedling or dermaplaning, for enhanced results.
