

The [National School Boards Association \(NSBA\) may be considering this climate action resolution very soon](#). Here is a template email you could share with your network. Top-level school stakeholders (parents, students, teachers, school board members) could email the NSBA directly: boardofdirectors@nsba.org. Please cc "empower@schoolsforclimateaction.org" so we can track outreach.

"Dear National School Boards Association:

Thank you for all of your important work supporting great public schools for kids and communities across America. I believe American public schools are one of our most vital public institutions, so I appreciate your service to them.

As a supporter of the non-partisan, youth-adult Schools for Climate Action campaign, I was happy to learn that the National School Boards Association was considering a non-partisan climate action resolution. I think it is so important that Congress hear from educational leaders detailing the risks and harm of climate inaction on American kids and schools. There are many positive steps Congress can pursue to help mitigate the impact of climate change for American young people and our public schools. Thank you for encouraging Congress to show leadership and to take action on this most important issue.

I am a _____ (*insert school stakeholder category---
parent-teacher-student-school board member, etc.*) in _____ district in _____
(city, state).

Thanks again for all of your work.

Sincerely,
