# ATXpo

The fifth ATXpo (Academic Technology Expo) took place at USF on Oct. 8. The event was a big success, with over 200 attendees from eight Bay Area colleges/universities gathered to share, discuss, and promote effective practices for teaching and learning with technology. **View video recap »**

Learning with your Mobile Device

Developed by USF Alum, Kevin Kelly, this **Lynda.com tutorial** provides instruction on how to use your mobile device for learning on the go. The tutorials explore techniques to build skills and engagement.

Badging 101

Learn about a pilot digital badging initiative underway in ETS to recognize learned skills and competencies. **Register now »** Splunk logo

Splunk Pledge

USF is participating in a special program to empower students, faculty, staff to learn Splunk by enrolling in free eLearning training. Learn More »

NEWS: ECHO360 & AIRTABLE SYSTEM

Echo360 active learning

Automated Video Transcripts Coming Spring 2019

We are excited to announce that in this upcoming spring 2019 semester, we will be rolling out a new solution for automatically generating video transcripts. Echo360, our platform for lecture capture, will be adding the ability to generate video transcriptions.
Echo360 has partnered with Amazon to bring us the powerful speech recognition technology that is available in their Echo products, which they have titled Amazon Speech Recognition. Students and instructors will be able to view these video transcripts directly within the video player. **Read More »**

New Airtable System

Learn About The New Airtable System

ETS is very happy to announce a new resource that provides virtually every detail about our classroom environment. Using the new Airtable system, information on classroom capacity, student furniture, AV and computing technology, and other details are easily accessed along with high resolution photographs. **Read More »**

WHAT'S NEW IN CANVAS?

Intersession and Spring 2019

Intersession and Spring 2019 Canvas course shells are now available on your Canvas Dashboard and All Courses list. As you prep for next semester, here is list of frequently asked questions (FAQs) that may help resolve issues you may encounter.

Respondus Lockdown Browser

Instructors can use Canvas Quizzing to create assessments that check for student understanding. For more high-stakes testing situations, consider enabling the Respondus

[Lockdown Browser add-on](#) for Canvas quizzes. The Respondus browser locks down the testing environment and prevents students from toggling to other applications or resources on their computer while taking a Canvas quiz.

Recent Canvas Updates

- DocViewer: Rotate page/images: Pages and images can now be rotated in the [Canvas DocViewer](#).
- Rubrics with No Points: When adding a rubric to an assignment, instructors can choose to remove criterion point values to create a non-scoring rubric. This change allows instructors to help their students focus on the feedback for an assignment instead of the actual point value and improve learning engagement.

Questions? Contact Canvas

24/7 Canvas support is available via the **Help** button found on the green, left navigation menu in Canvas. From here, you can choose to C**hat with Canvas Support** or, if you prefer, talk to a live person by dialing **(833) 668-1666**. Also make sure to visit the [USF Canvas support page](#) for FAQs and more.
