Author's information

1. Surname, name:

Aitkhodzhayeva Gulraykhan.

2. Position, academic degree, title:

lecturer, master of economics.

3. Education:

- Kazakh state women's pedagogical institute, faculty of Physics and mathematics, specialty "Mathematics", 1985, diploma LV № 093953;

- Higher school of banking, specialty "Finance and credit", qualification "Economist", diploma ZhB № 0234988 dated 13.06.2002;

- ATU, magistracy, specialty 6M050600 - "Economics", 2012-2014.

4. Field and directions of research, including participation in scientific projects with a brief description of the research results:

Area and directions of research:

- white sugar production, vegetable processing.

Participation in scientific projects:

project executor:

- "Development of a project for the development of white sugar production in Kazakhstan on the basis of an agricultural consumer cooperative", 2019-2021.

Results:

typical models of large production rural consumer cooperatives (SEC), which will stably and efficiently conduct their activities on more modern equipment and technology using scientifically based crop rotation in accordance with the approved memorandum of association and the Charter of the SEC.

- "Development of a project for the creation of mini plants for processing vegetables", 2022-2024.

Results:

marketing research and literature review shows that in most regions of Kazakhstan, the consumption of vegetables and fruits fluctuates sharply depending on the time of year. As a rule, they are enough in the second half of summer and autumn and not enough at the end of winter and early spring. The volume of imported vegetable products is revealed.
