Remote Debugging on mobile from Desktop (Advanced)

If you want full desktop-like Inspect tools for a site opened on your phone:

1. **Connect your mobile to your computer** via USB.
2. On your **phone**, enable **Developer Options** and **USB Debugging** (Android only).
   How to enable developer option in android phones. https://youtu.be/7K6AWPCAkiU
3. On your **desktop**, open **Google Chrome**, go to:
   `chrome://inspect`
4. It will detect your mobile device. Click **"Inspect"** under the tab you want.
5. Now you can inspect and edit the mobile site live from your desktop.
6. The change will reflect instantly on the webpage — but remember:
   🛑 **This is temporary** and only visible on your screen. It will disappear when you refresh the page. But in this Binary trading platforms you can place trades and they will reflect the results also till you do not refresh the page which makes them suspicious for scam and these binary trading influencer uses this to trap traders.

Use Safari Developer Tools (Requires a Mac)

If you have a **Mac** and want to inspect a website open on your iPhone/iPad using your Mac's Safari:

🧰 What you need:

- A **Mac computer**
- Your **iPhone/iPad**
- A **USB cable**

🧪 Steps:

1. On iPhone:
   - Go to **Settings > Safari > Advanced**

    - Turn on **Web Inspector**
2. On Mac:
    - Open **Safari**
    - Go to **Safari > Preferences > Advanced**
    - Check ✅ **"Show Develop menu in menu bar"**
3. Connect iPhone/iPad to Mac via USB.
4. Open Safari on iPhone and go to the page you want to inspect.
5. On Mac Safari, click **Develop > [Your Device Name] > [Page]**
   → It will open a full developer console for the mobile page.
6. The change will reflect instantly on the webpage — but remember:
   🛑 **This is temporary** and only visible on your screen. It will disappear when you refresh the page. But in this Binary trading platforms you can place trades and they will reflect the results also till you do not refresh the page which makes them suspicious for scam and these binary trading influencer uses this to trap traders.

🔧 Steps to Edit a Website Temporarily Using Inspect Element:

1. **Open the website** you want to edit in your browser.
2. **Right-click** on the text or element you want to change.
3. Click **"Inspect"** or **"Inspect Element"** from the context menu.
4. The **Developer Tools** panel will open (usually on the side or bottom of your screen).
5. In the **Elements** tab, you'll see the website's HTML code.
    - Hover over different tags to see which part of the page they control.
6. **Double-click** on the text within the HTML code you want to change.
7. Type your new content, and press **Enter**.
8. The change will reflect instantly on the webpage — but remember:
   🛑 **This is temporary** and only visible on your screen. It will disappear when you refresh the page. But in this Binary trading platforms you can place trades and they will reflect the results also till you do not refresh the page which makes them suspicious for scam and these binary trading influencer uses this to trap traders.
