

[UtahRealEstate] Shows incorrect listings if Minimum price is higher than maximum

Description

Searching for rental listings allows entering a minimum that is higher than the maximum, but filters only based on maximum at that point.

Replication Steps

1. Open UtahRealEstate.com
2. Click Rentals in the top right corner
3. Enter a Maximum Price (Something like 3000)
4. Enter a minimum of something higher(like 3500)
5. Hit Enter
6. Fix price from 3000000 to 3000 and 350000 to 3500
7. Hit Enter

Expected Behavior

Should show rentals between 3500 and 3000, and nothing else.

Actual Behavior

It shows all listings from 0-3000. It disregards that Minimum and only filters on the Maximum
