

SolarianTech

10.11.2024

SolarianTech Company

Overview

SolarianTech is a groundbreaking blockchain project focused on financing solar power plants. By distributing **SLRN** tokens, SolarianTech empowers users to contribute directly to

renewable energy projects, making clean energy accessible to all while offering financial incentives through token ownership and participation.

Goals

1. Facilitate the transition to renewable solar energy globally.
2. Provide a transparent and accessible investment platform using blockchain technology.
3. Encourage active user engagement through rewards and community-driven tasks.

Specifications

SolarianTech issues **1 billion SLRN** tokens to fund solar power plants. Users earn tokens through completing tasks, participating in airdrops, and staking. The **SLRN** token system is designed to be simple, fair, and rewarding for everyone involved. The project offers 5-layer referral rewards, adding an exciting incentive for community growth.

Advantages

- **Environmental Impact:** Contribute directly to building solar power plants and reducing carbon emissions.
- **Clear Token Distribution:** Each user knows exactly how many tokens they will earn based on their participation, providing clarity and trust.
- **Referral System:** Earn tokens not only from your own activity but also from your referrals, up to five layers deep.
- **Staking Rewards:** Users can earn additional rewards when their referrals stake their tokens, offering continuous passive income.
- **Solar-Themed Game:** A unique, interactive game that emphasizes capturing solar energy, aligning with the project's mission to harness the power of the sun.

Milestones

- Official launch of the SolarianTech Airdrop.
- Begin construction of the first solar power plant funded by **SLRN** tokens.
- Further expansion into international markets and establishing partnerships with clean energy advocates.
